## PREFACE

## PRÉFACE

"Dimensions" is a data series designed to provide information on selected topics for which considerable interest has been expressed. The series consists of seven publications each with varying data presentation and geographic coverage.

Three publications present profiles of selected populations. These are:

Profile of Ethnic Groups (Cat. No. 93-154), Canada only

Profile of the Immigrant Population (Cat. No. 93-155), Canada, provinces and territories

Canadians and Their Occupations - A Profile (Cat. No. 93-157), Canada only

The other four publications present more detailed information or cross-tabulations. These are:

Occupational Trends, 1961-1986 (Cat. No. 93-151), Canada, provinces and territories

Industry Trends, 1951-1986 (Cat. No. 93-152), Canada, provinces and territories

Language Retention and Transfer (Cat. No. 93-153), Canada, provinces, territories, Montréal and Ottawa-Hull census metropolitan areas

Census Metropolitan Areas (Cat. No. 93-156), the 25 census metropolitan areas

In addition to "Dimensions", there are two other data series. The "Profiles" series provides a statistical overview of a particular subprovincial area (e.g., municipality) touching on a wide selection of census variables but providing a limited amount of detail. "The Nation" is a data series designed to illustrate the scope and depth of the 1986 Census subject-matter by presenting considerable detail on variables, cross-tabulating variables, or providing historical data.

"Dimensions" est une série de données destinées à fournir des renseignements sur certains sujets qui ont suscité un intérêt considérable. La série comprend sept publications dont chacune présente différentes données et couvre différentes régions.

Des profils de certaines populations sont présentés dans les trois publications suivantes:

Profil des groupes ethniques (nº 93-154 au catalogue), Canada seulement

Profil de la population immigrante (nº 93-155 au catalogue), Canada, provinces et territoires

Les Canadiens et leurs professions: Un profil (nº 93-157 au catalogue), Canada seulement

Les quatre autres publications donnent de plus amples renseignements ou présentent des tableaux croisés. Elles sont:

Tendances au niveau de la profession, 1961-1986 (nº 93-151 au catalogue), Canada, provinces et territoires

Tendances au niveau de l'industrie,1951-1986 (nº 93-152 au catalogue), Canada, provinces et territoires

Rétention et transfert linguistiques (nº 93-153 au catalogue), Canada, provinces, territoires et régions métropolitaines de recensement de Montréal et d'Ottawa-Hull

Régions métropolitaines de recensement (nº 93-156 au catalogue), les 25 régions métropolitaines de recensement

En plus de la série "Dimensions", on prévoit publier deux autres séries. La série des "Profils" donne un aperçu statistique d'une région géographique donnée (par exemple, une municipalité) en utilisant une vaste gamme de variables du recensement, mais avec un niveau de détail limité. "Le Pays" est une série de données destinées à illustrer l'étendue et l'ampleur des sujets du recensement de 1986 en affichant un niveau de détail considérable sur les variables ou les croisements de variables et en fournissant des données chronologiques.

### HIGHLIGHTS

On Census Day 1986, the ethnic background of 28% of Canadians included more than one ethnic origin.

The ethnic groups with the highest proportion of multiple response were the Welsh (84%), Irish (81%), Swedish (79%) and Scottish (78%). Those groups with the lowest proportion of multiple response were Koreans (7%), Cambodians (12%), Filipinos (13%) and the Chinese (13%) (Table 2).

In 1986, ethnic origin categories with over 70% of their total population living in Canada's three largest urban centres (Toronto, Montréal and Vancouver) were the Caribbean (76%), West Asians (75%) and Pacific Islanders (73%). Aboriginals (12%) were least likely to reside in these metropolitan areas (Table 1).

The ethnic categories having the greatest proportion of their population under 25 years of age were the multiple response categories of East/South East Asians (66%) and Latin, Central and South Americans (66%). The ethnic category with the smallest youth population was the single response Northern Europeans (17%) (Table 1).

At the other end of the age scale, the single reponse ethnic categories having the greatest percentage of persons aged 65 years and over were Northern Europeans (22%) and Eastern Europeans (19%). The elderly comprised between 3% to 4% of the following single response categories: Latin, Central and South American, Pacific Islands, Black, Caribbean, Aboriginal and South Asian. The multiple response population for all ethnic categories, with the exception of the British multiple response group, had less than 4% of its population 65 years of age and older (Table 1).

When single response ethnic groups are compared, Chileans (81%) and Estonians (81%) had the highest proportion with a mother tongue other than English or French (Table 3).

Vietnamese and Cambodians were the single response groups most likely to speak a language other than English or French at home. Over two-

#### **FAITS SAILLANTS**

Le jour du recensement, 1986, 28% des Canadiens recensés ont indiqué plus d'une origine ethnique.

Les Gallois (84%), les Irlandais (81%), les Suédois (79%) et les Écossais (78%) sont les groupes ethniques pour lesquels on a relevé la plus forte proportion de réponses multiples. Les Coréens (7%), les Cambodgiens (12%), les Philippins (13%) et les Chinois (13%) sont ceux pour lesquels on a relevé la proportion la plus faible (tableau 2).

En 1986, au nombre des catégories d'origine ethnique dont plus de 70% de la population totale habitait dans l'un des trois plus grands centres urbains du Canada (Toronto, Montréal ou Vancouver), on comptait celles des Caraïbes (76%), d'Asie occidentale (75%) et des îles du Pacifique (73%). Les autochtones (12%) étaient les moins susceptibles d'habiter dans ces régions métropolitaines (tableau 1).

Les catégories ethniques dont la majeure partie de la population était âgée de moins de 25 ans étaient des catégories de réponses multiples soit celles de l'Asie de l'Est et du Sud-Est (66%) et de l'Amérique latine, centrale et du Sud (66%). La catégorie ethnique dont la population comptait le moins de jeunes était celle d'origine d'Europe septentrionale (17%) qui a fourni des réponses uniques (tableau 1).

À l'autre extrémité de la classification selon l'âge, les catégories ethniques ayant fourni des réponses uniques pour lesquelles on a relevé le plus fort pourcentage de personnes âgées de 65 ans et plus sont celles d'Europe septentrionale (22%) et orientale (19%). Les personnes âgées représentaient entre 3% et 4% des catégories de réponses uniques suivantes: Amérique latine, centrale et du Sud, îles du Pacifique, noire, Caraïbes, autochtones et sud-asiatique. Pour toutes les catégories ethniques, sauf la catégorie britannique, la population ayant fourni des réponses multiples comptait moins de 4% de personnes âgées de 65 ans et plus (tableau 1).

La comparaison des groupes ethniques ayant fourni des réponses uniques révèle qu'on retrouvait la plus forte proportion de personnes dont la langue maternelle est autre que le français ou l'anglais chez les Chiliens (81%) et les Estoniens (81%) (tableau 3).

Parmi les groupes ayant fourni des réponses uniques, les Vietnamiens et les Cambodgiens étaient ceux qui, vraisemblablement, parlaient à thirds of Vietnamese spoke Vietnamese at home, while the same proportion of Cambodians spoke Khmer (Cambodian) at home (Table 3).

Other than Aboriginals, the groups who had the lowest proportion of immigrants were multiple response Icelandic (2%), multiple response Ukrainian (3%) and multiple response Norwegian (4%). Those with the highest proportion of immigrants were the single response groups of Iranians (93%), Vietnamese (89%), Cambodians (89%) and Other Latin, Central and South American origins (88%) (Table 2).

Among single response groups, Laotians and Cambodians had the greatest proportion of recent immigrants. In 1986, 98% of Laotian immigrants and 95% of Cambodian immigrants came to Canada between 1978 and 1986 (Table 2).

The groups most likely to have university degrees were single response Egyptians (46%), Iranians (37%), Jewish (30%) and Filipinos (29%). In contrast, single response Inuit (60%), Cambodians (49%) and Portuguese (45%) had the highest proportions with less than Grade 9 education (Table 2).

Multiple response Northern European and Eastern European men had the highest labour force participation rates: 85%, while single response Aboriginal men had the lowest: 61%. Among women, those in the ethnic categories of multiple response Caribbean (72%), single response Black (71%), and multiple response Eastern European (70%) and East/South East Asian (70%) had the highest labour force participation rates. Single response Aboriginal women had the lowest rate at 40% (Table 1).

The ethnic category with the highest average 1985 income was single response Northern European men (\$25,064), while single response Aboriginal women had the lowest average income (\$8,579) (Table 1).

la maison une langue autre que le français ou l'anglais. Plus des deux tiers des Vietnamiens parlaient le vietnamien à la maison et la même proportion de Cambodgiens parlaient le khmer (cambodgien) à la maison (tableau 3).

À part les autochtones, les groupes où l'on retrouvait la plus faible proportion d'immigrants étaient ceux des Islandais (2%), des Ukrainiens (3%) et des Norvégiens (4%), qui avaient tous fourni des réponses multiples. On retrouvait la plus forte proportion d'immigrants au sein des groupes à réponses uniques des Iraniens (93%), des Vietnamiens (89%), des Cambodgiens (89%) et des autres origines de l'Amérique latine, centrale et du Sud (88%) (tableau 2).

Parmi les groupes ayant fourni des réponses uniques, les Laotiens et les Cambodgiens comptaient la plus forte proportion d'immigrants récents. En 1986, 98% des immigrants laotiens et 95% des immigrants cambodgiens étaient arrivés au Canada entre 1978 et 1986 (tableau 2).

Les groupes où l'on retrouvait vraisemblablement le plus grand nombre de diplômés universitaires étaient ceux des Égyptiens (46%), des Iraniens (37%), des Juifs (30%) et des Philippins (29%) qui avaient fourni des réponses uniques. Par contre, les groupes des Inuits (60%), des Cambodgiens (49%) et des Portugais (45%), qui avaient fourni des réponses uniques, affichaient les plus fortes proportions de personnes n'ayant pas terminé leur 9° année (tableau 2).

Les taux d'activité les plus élevés ont été enregistrés chez les hommes originaires de l'Europe septentrionale et de l'Europe orientale ayant fourni des réponses multiples (85%), et les moins élevés, chez les hommes autochtones ayant fourni des réponses uniques (61%). Chez les femmes, les taux d'activité les plus élevés ont été enregistrés chez les catégories originaires des Caraïbes ayant fourni des réponses multiples (72%), de la catégorie noire ayant fourni des réponses uniques (71%), des catégories originaires de l'Europe orientale (70%) et de l'Asie de l'Est et du Sud-Est (70%) ayant fourni des réponses multiples. Les femmes autochtones à origine unique affichaient le taux le plus faible, avec 40% (tableau 1).

La catégorie ethnique dont le revenu moyen était le plus élevé en 1985 était celle des hommes originaires d'Europe septentrionale ayant fourni des réponses uniques (\$25,064). Par ailleurs, les femmes autochtones ayant fourni des réponses uniques affichaient le revenu moyen le moins élevé (\$8,579) (tableau 1).

The ethnic groups with the highest earned income for males working full time, full year were the following single response groups: Jewish (\$47,000), Egyptians (\$38,568) and Estonians (\$37,361). Those males who earned the least were the single response groups of Cambodians (\$16,148), Laotians (\$16,897), Haitians (\$20,652) and Vietnamese (\$21,742) (Table 2).

Among women, the ethnic groups with the highest earned income for full-time, full-year workers were the following single response groups: Estonians (\$25,403), Latvians (\$25,207) and Jewish (\$25,171). Those women who earned the least were total response Laotians (\$12,070), multiple response Vietnamese (\$14,052), total response Cambodians (\$14,237) and single response Haitians (\$14,645) and Chileans (\$14,879) (Table 2).

Les groupes ethniques où les hommes gagnaient le revenu d'emploi le plus élevé pour un travail à plein temps toute l'année étaient les groupes ayant fourni des réponses uniques suivantes: les Juifs (\$47,000), les Égyptiens (\$38,568) et les Estoniens (\$37,361). Les hommes dont le salaire était le moins élevé appartenaient aux groupes à réponses uniques des Cambodgiens (\$16,148), des Laotiens (\$16,897), des Haïtiens (\$20,652) et des Vietnamiens (\$21,742) (tableau 2).

Les femmes dont le revenu d'emploi était le plus élevé pour un travail à plein temps toute l'année faisaient partie des groupes ethniques ayant fourni des réponses uniques suivantes: Estoniens (\$25,403), Lettons (\$25,207) et Juifs (\$25,171). Les femmes dont le revenu d'emploi était le moins élevé appartenaient aux catégories englobant le total des réponses uniques et multiples des Laotiens (\$12,070), aux catégories de réponses multiples des Vietnamiens (\$14,052), aux catégories englobant le total des réponses uniques et multiples des Cambodgiens (\$14,237) et aux catégories de réponses uniques des Haïtiens (\$14,645) et des Chiliens (\$14,879) (tableau 2).

## GUIDELINES FOR USING THIS PUBLICATION

#### PURPOSE

This publication presents a "statistical" profile of selected ethnic groups. For each group, single and multiple origins are shown by selected demographic, social and economic characteristics such as age, marital status, mother tongue, education and income. The level of geography is Canada only.

# ORGANIZATION OF THE PUBLICATION

In total, 76 selected ethnic groups are profiled in this publication, 16 of which are major ethnic categories. Data for these major categories are presented in Table 1 (see pages 1-1 to 1-64). For example, the West Asian category, which is comprised of Armenian, Iranian, Israeli and Turk groups, is profiled on page 1-33. Appendix 2 displays the composition of these major ethnic categories.

Table 2 shows data for 60 selected ethnic groups (see pages 2-1 to 2-240). For example, Armenian and Iranian, two of the groups which comprise the West Asian category, are profiled individually. The Armenian profile is found on page 2-146 and the Iranian profile is found on page 2-186. Groups with single response counts of 8,000 or more for Canada were selected for this publication.

Users interested in locating data for a specific ethnic group should refer to the "Index of Ethnic Groups" for the location of data in the publication. The index is found on page xxi (blue pages).

A third table shows a more detailed distribution of mother tongue and home language data for each of the 76 ethnic groups profiled in this publication.

#### TABLE DESCRIPTIONS

Below is a brief description of the tables presented in this publication. Definitions of the terms and concepts used are provided in the "Definitions" section at the end of the publication.

## LIGNES DIRECTRICES POUR L'UTILISATION DE CETTE PUBLICATION

#### BUT

La présente publication donne un profil "statistique" de certains groupes ethniques. Pour chaque groupe, les origines uniques et multiples sont indiquées selon certaines caractéristiques démographiques, sociales et économiques, comme l'âge, l'état matrimonial, la langue maternelle, la scolarité et le revenu. Les données sont présentées pour le Canada seulement.

#### ORGANISATION DE LA PUBLICATION

La présente publication montre 76 groupes ethniques au total, dont 16 sont des principales catégories ethniques. Les données pour ces principales catégories sont présentées au tableau 1 (voir les pages 1-1 à 1-64). Par exemple, la catégorie "Origines d'Asie occidentale", qui comprend les Arméniens, les Iraniens, les Israéliens et les Turcs, apparaît à la page 1-33. L'annexe 2 donne la composition de ces catégories ethniques principales.

Le tableau 2 présente les données pour 60 groupes ethniques (voir les pages 2-1 à 2-240). Par exemple, les Arméniens et les Iraniens, deux groupes qui font partie de la catégorie "Origines d'Asie occidentale", sont montrés individuellement. Le profil des Arméniens se trouve à la page 2-146 et le profil des Iraniens se trouve à la page 2-186. On a choisi, pour la présente publication, les groupes ayant des chiffres de réponses uniques de 8,000 ou plus pour le Canada.

Les utilisateurs intéressés à certaines données concernant un groupe ethnique en particulier doivent se reporter à l'"Index des groupes ethniques" à la page xxi (pages bleues).

Un troisième tableau donne une répartition plus détaillée de la langue maternelle et de la langue parlée à la maison pour chacun des 76 groupes ethniques mentionnés dans la présente publication.

#### **DESCRIPTION DES TABLEAUX**

Vous trouverez ci-dessous une brève description des tableaux contenus dans la présente publication. Les définitions des termes et des concepts utilisés sont offertes dans la section "Définitions" à la fin de l'ouvrage.

Both Table 1 and Table 2 display identical data variables for each ethnic group shown in this publication. The data variables, for example, age, marital status, occupation and income, are identified down the sides of the table (" the stub"). The entire stub covers four full pages.

Shown across the top of **Tables 1** and **2** are ethnic response types (single, multiple and total responses) by sex, for Canada. (See the SPECIAL NOTE "Comparability of Data on Ethnic Origin" for definitions of single, multiple and total responses.)

A two-page layout is used to present data for two ethnic groups at a time. The characteristics of one group are presented on the left-hand page, while the characteristics of the second group are displayed on the right-hand page. For example, data for **British origins** are found on pages 1-1, 1-3, 1-5, and 1-7. Data for **French origins** are found on pages 1-2, 1-4, 1-6 and 1-8.

Table 3 provides a more detailed distribution of mother tongue and home language data for each of the 76 ethnic groups. For mother tongue, the non-official language with the highest count for each group is shown. Home language data are also provided for these non-official languages. The level of geography for this table is Canada only.

# GEOGRAPHIC AND CONTENT CONSIDERATIONS

Count discrepancies between 100% data and 20% sample data: Counts of the population, households, dwellings or families shown in tabulations based on a 20% sample may differ from those collected on a 100% basis for the following reasons:

(1) The exclusion of institutional residents: Institutional residents are defined as those individuals other than staff members and their families who live in institutional collective dwellings such as homes for the elderly, hospitals and correctional institutions. Detailed sample data were not collected from this sector of the population.

Le tableau 1 et le tableau 2 présentent des variables identiques pour chacun des groupes ethniques mentionnés dans la publication. Les variables, par exemple, l'âge, l'état matrimonial, la profession et le revenu, sont identifiées sur les côtés du tableau (la "colonne de titres"). La colonne de titres couvre quatre pages.

Au haut des **tableaux 1 et 2** se trouvent les genres de réponses (uniques, multiples et totales) sur l'origine ethnique selon le sexe, pour le Canada. (Voir la NOTE SPÉCIALE "Comparabilité des données sur l'origine ethnique" pour une définition des réponses uniques, multiples et totales.)

Une présentation de deux pages a été utilisée pour montrer les données de deux groupes ethniques à la fois. Les caractéristiques d'un groupe sont présentées sur la page de gauche tandis que celles du deuxième groupe apparaissent sur la page de droite. Par exemple, les données sur les **origines britanniques** se trouvent aux pages 1-1, 1-3, 1-5 et 1-7 alors que celles sur les **origines françaises** se trouvent aux pages 1-2, 1-4, 1-6 et 1-8.

Le tableau 3 donne une répartition plus détaillée de la langue maternelle et la langue parlée à la maison pour chacun des 76 groupes ethniques. Pour la langue maternelle, la langue non officielle ayant le plus haut chiffre pour chaque groupe est indiquée. Les données sur la langue parlée à la maison sont également presentées pour ces langues non officielles. Les données du tableau sont présentées pour le Canada seulement.

### FACTEURS DE GÉOGRAPHIE ET DE CONTENU

Divergences des chiffres entre les données intégrales et les données-échantillon (20%): Les chiffres de la population, des ménages, des logements ou des familles des tableaux utilisant les données-échantillon (20%) peuvent différer des données intégrales pour les raisons suivantes:

(1) L'exclusion des pensionnaires d'institution: Ces derniers sont définis comme les personnes autres que les membres du personnel et de leurs familles qui vivent dans les logements collectifs tels que les foyers pour personnes âgées, les hôpitaux et les établissements de correction. On n'a pas recueilli de données-échantillon détaillées pour ce segment de la population.

(2) Weighting: Data collected on a sample basis were weighted up to provide estimates of the entire population. However, weighted counts are subject to sampling variability. This means, for any given area, the weighted count may differ from that shown in tabulations containing data collected on a 100% basis. While the differences are relatively small for geographic areas with large populations, they can be greater for areas with small populations. For further information on this topic, please contact Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

Users should also be aware that differences in counts may be due to the different subpopulations or universes for which the data are reported. For example, mobility data are reported for persons 5 years and over excluding those temporarily residing overseas; education and labour force data are reported for persons 15 years and over. Furthermore, data may be produced for subsets of these education and labour universes such as total labour force, employed labour force, etc. Similar differences may occur in tabulations for households, dwellings or families. The 1986 Census Dictionary (Catalogue No. 99-101E or F) provides more detailed information on universes or subpopulations by variable.

Incompletely enumerated Indian reserves and Indian settlements: On some Indian reserves or settlements, census enumeration was not permitted or was interrupted. Therefore, data are not available for these reserves and tables have been footnoted accordingly. This issue is discussed more fully in the SPECIAL NOTES section.

Additional information on geographic and content considerations, definitions of terms, explanations of data quality, etc., may be found at the end of this publication immediately following the tables (see pink pages). This information is presented separately in English and French sections for easier use.

(2) Pondération: Les données-échantillon sont pondérées afin d'obtenir des estimations de la population tout entière. Cependant, les chiffres pondérés se caractérisent par la variabilité d'échantillonnage, ce qui signifie que pour toute région donnée, le chiffre pondéré peut différer de celui qui figure dans les tableaux contenant les données intégrales. Bien que les différences soient relativement faibles pour les régions géographiques avant de fortes populations, elles peuvent être plus importantes dans le cas des régions avec de petites populations. Pour plus de renseignements sur ce sujet, veuillez communiquer avec la Division des méthodes d'enquêtes sociales de Statistique Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

Les utilisateurs doivent également noter que les différences de chiffres peuvent s'expliquer par les différences de sous-population ou d'univers dont les données sont publiées. Ainsi, les données de la mobilité sont publiées pour les personnes âgées de cing ans et plus, excluant celles qui résident temporairement outre-mer: les données sur la scolarité et l'activité ne sont déclarées que pour les personnes âgées de 15 ans et plus. De plus, des données peuvent être produites pour les sousensembles de ces univers de la scolarité et de l'activité tels que la population active totale, la population active occupée, etc. Des différences similaires peuvent se glisser dans les tableaux pour les ménages, les logements ou les familles. Le Dictionnaire du recensement de 1986 (nº 99-101F ou E au catalogue) contient plus de renseignements détaillés sur les univers ou les sous-populations par variable.

Réserves indiennes et établissements indiens partiellement dénombrés: Dans certaines réserves indiennes et établissements indiens, les recenseurs n'ont pas eu la permission d'effectuer le dénombrement ou ont dû l'interrompre. Les données ne sont donc pas disponibles pour ces réserves et des notes au bas des tableaux apparaissent selon le besoin. Pour des précisions à ce sujet, voir la section NOTES SPÉCIALES.

Vous trouverez d'autres renseignements complémentaires sur les facteurs de géographie et de contenu, la définition détaillée des termes, des précisions sur la qualité des données, etc., à la fin de la publication, immédiatement après les tableaux (voir les pages roses). Ces renseignements sont présentés dans des sections française et anglaise distinctes, ce qui en facilite la consultation.

93-154

# 1986 CENSUS PRODUCTS AND SERVICES

The 1986 Census product line is designed to serve the diverse needs of our users. Using as a base the most demanded publications of past censuses, a full series of data, reference and analytical publications will be offered.

In addition to the tabulations shown in publications, census data are available in machine-readable form. In particular, there is a set of 44 basic summary tabulations for small geographic areas including enumeration areas, census tracts and census subdivisions. The data contained in the published profiles for census subdivisions and census divisions, census tracts, federal electoral districts, census metropolitan areas and census agglomerations are also available in machine-readable form.

While many tabulations are available from the planned output program, census tabulations can also be customized to individual users' needs. A range of products is offered, from predetermined basic data tabulations available for user-selected geographic areas, to complete custom tabulations which are developed to the exact requirements of the client. The products thus offer, on a cost-recovery basis, varying levels of flexibility in content, geography and medium.

The data shown in this publication can be obtained for geographies other than Canada or for ethnic groups other than those shown in this publication. For more information, users should contact the nearest Statistics Canada Regional Office (addresses and phone numbers are listed on page xLvii) or contact the Census Custom Products Service, Statistics Canada, Ottawa, Ontario K1A 0T6, telephone (613) 951-9534.

#### OTHER ETHNIC ORIGIN DATA PRODUCTS

There are several other products from the 1986 Census which contain ethnic origin data. These include:

#### PRODUITS ET SERVICES DU RECENSEMENT DE 1986

La gamme des produits du recensement de 1986 doit répondre aux besoins variés de nos utilisateurs. En fonction des publications les plus populaires des derniers recensements, nous offrirons une série complète de données, de documents de référence et d'ouvrages analytiques.

En plus des totalisations présentées dans les publications, les données du recensement sont disponibles sous forme lisible par machine. Notamment, une série de 44 totalisations sommaires de base existe pour les petites régions géographiques comprenant les secteurs de dénombrement, les secteurs de recensement et les subdivisions de recensement. Les données contenues dans les profils publiés pour les subdivisions de recensement et les divisions de recensement, les secteurs de recensement, les circonscriptions électorales fédérales, les régions métropolitaines de recensement et les agglomérations de recensement sont également disponibles sous forme lisible par machine.

Même si plusieurs totalisations sont disponibles à partir du programme des produits déjà établi, des totalisations du recensement peuvent également être personnalisées selon les besoins de l'utilisateur. Il est possible de se procurer une gamme de produits allant des totalisations de données fondamentales, déterminées à l'avance, disponibles pour les régions géographiques choisies par l'utilisateur, à des totalisations entièrement personnalisées et préparées selon les exigences précises du client. Ainsi, ces produits permettent d'offrir, contre recouvrement des coûts, différents niveaux de souplesse en matière de contenu, de géographie et de support.

On peut obtenir les données trouvées dans la présente publication pour des régions autres que le Canada et pour des groupes ethniques autres que ceux mentionnés dans la publication. Pour de plus amples renseignements, les utilisateurs sont priés de communiquer avec le bureau régional de Statistique Canada le plus près (les adresses et les numéros de téléphone se trouvent à la page Lxxv) ou de communiquer avec le Service des produits personnalisés du recensement, Statistique Canada, Ottawa (Ontario) K1A 0T6, téléphone (613) 951-9534.

#### AUTRES PRODUITS DE DONNÉES SUR L'ORIGINE ETHNIQUE

Il existe plusieurs autres produits du recensement de 1986 qui contiennent des données sur l'origine ethnique. Ils sont:

#### NATION SERIES

 Ethnicity, Immigration and Citizenship (Catalogue No. 93-109)

Part 1 of this publication presents detailed distributions of ethnic origin data from the 1986 Census, for Canada, provinces and territories.

Total Income: Individuals (Catalogue No. 93-114)

Included in this publication are 1985 total income groups by sex, and selected ethnic origins (Table 10), for Canada, provinces and territories.

- Family Income: Economic Families (Catalogue No. 93-118)

This publication contains two tables which show 1985 income status for economic families by ethnic origin of husband/reference person, for Canada and the provinces only (Tables 4A and 4B).

 Household Income: Private Households (Catalogue No. 93-119)

Data on 1985 income distributions for private households are shown by selected characteristics, including ethnic origin (Table 6), for Canada, provinces and territories.

#### **DIMENSION SERIES**

- Language Retention and Transfer (Catalogue No. 93-153)

This publication contains five tables, one of which cross-classifies mother tongue data by sex, ethnic origin and home language (Table 4). Data for this table are presented for Canada, provinces, territories and census metropolitan areas of Montréal and Ottawa-Hull.

#### SÉRIE: LE PAYS

- Origine ethnique, immigration et citoyenneté (nº 93-109 au catalogue)

La partie 1 de cette publication donne des répartitions détaillées des données sur l'origine ethnique, tirées du recensement de 1986, pour le Canada, les provinces et les territoires.

- Revenu total des particuliers (nº 93-114 au catalogue)

Cette publication présente les tranches de revenu total en 1985 selon le sexe, et certaines origines ethniques (tableau 10), pour le Canada, les provinces et les territoires.

- Revenu de la famille: familles économiques (nº 93-118 au catalogue)

Cette publication renferme deux tableaux qui présentent les catégories de revenu en 1985 des familles économiques selon l'origine ethnique de l'époux ou de la personne de référence, pour le Canada et les provinces seulement (tableaux 4A et 4B).

Revenu du ménage: ménages privés (nº 93-119 au catalogue)

Les données sur la répartition du revenu en 1985 des ménages privés sont présentées selon certaines caractéristiques, y compris l'origine ethnique (tableau 6), pour le Canada, les provinces et les territoires.

#### **SÉRIE: DIMENSIONS**

- **Rétention et transfert linguistiques** (nº 93-153 au catalogue)

Cette publication renferme cinq tableaux, dont un qui recoupe les données sur la langue maternelle selon le sexe, l'origine ethnique et la langue parlée à la maison (tableau 4). Les données de ce tableau sont fournies pour le Canada, les provinces, les territoires et les régions métropolitaines de recensement de Montréal et d'Ottawa-Hull.

## - Profile of the Immigrant Population (Catalogue No. 93-155)

Data on the selected characteristics of the immigrant population are presented for Canada, provinces and territories. The immigrant population is shown by period of immigration and sex, cross-classified by other variables such as ethnic origin. Data on the non-immigrant population are also presented.

## - Census Metropolitan Areas (Catalogue No. 93-156)

This publication provides data covering a wide range of census variables for the 25 census metropolitan areas. Included are data on selected ethnic origins by single, multiple and total responses (Table 9) for each census metropolitan area. This table contains a more detailed distribution and cross-classification than can be obtained from the "Profile" series.

#### Canadians and Their Occupations: A Profile (Catalogue No. 93-157)

This publication presents data for approximately 200 selected detailed occupations by sex showing a range of demographic, economic and socio-cultural characteristics, including ethnic origin, for Canada.

#### PROFILE SERIES

This series includes ethnic origin data, as well as information on a wide range of other census variables. Data are presented for a variety of subprovincial areas: Census Divisions and Subdivisions (94-101 to 94-124), Federal Electoral Districts (94-125, 94-126, 94-133 and 94-134), Census Metropolitan Areas and Census Agglomerations (94-127 and 94-128), Censustracted Centres (Census Tracts and Component Subdivisions) (95-101 to 95-174), Urban and Rural Areas (94-129 and 94-130) and Labour Force Survey Economic Regions (94-131). Data for profiles are also available in machine-readable form.

## - Profil de la population immigrante (nº 93-155 au catalogue)

Les données sur certaines caractéristiques de la population immigrante sont présentées pour le Canada, les provinces et les territoires. La population immigrante est ventilée selon la période d'immigration et le sexe, recoupée selon d'autres variables comme l'origine ethnique. La publication contient également des données sur la population non immigrante.

## - Régions métropolitaines de recensement (nº 93-156 au catalogue)

Cette publication contient des données sur un vaste éventail de variables pour les 25 régions métropolitaines de recensement. Les données sur certaines origines ethniques selon les réponses uniques, multiples et totales (tableau 9) sont présentées pour chaque région métropolitaine de recensement. Le tableau contient une répartition et un classement recoupé plus détaillé que ceux trouvés dans la série des profils.

## - Les Canadiens et leurs professions: Un profil (nº 93-157 au catalogue)

Cette publication renferme des données sur environ 200 professions détaillées selon le sexe et diverses caractéristiques démographiques, économiques et socio-culturelles, y compris l'origine ethnique, pour le Canada.

#### **SÉRIE: PROFILS**

Cette série comprend des données sur l'origine ethnique ainsi que des renseignements sur une vaste gamme d'autres variables du recensement. Les données sont présentées pour plusieurs régions infraprovinciales: divisions et subdivisions de recensement (94-101 à 94-124), circonscriptions électorales fédérales (94-125, 94-126, 94-133 et 94-134), régions métropolitaines de recensement et agglomérations de recensement (94-127 et 94-128), centres urbains divisés en secteurs de recensement (secteurs de recensement et subdivisions composantes) (95-101 à 95-174), régions urbaines et rurales (94-129 et 94-130) et régions économiques de l'Enquête sur la population active (94-131). Les données des profils sont également disponibles sous forme lisible par machine.

93-154 93-154

#### **FOCUS ON CANADA SERIES**

## Ethnic Diversity in Canada (Catalogue No. 98-132)

This study reviews the changing ethnic profile of Canada and the distribution of major ethnic groups. It examines the applicability of cultural mosaic and melting pot concepts to the Canadian situation. Special attention is focussed on the population reporting multiple ethnicity. The role played by immigration is incorporated into the analysis.

#### METROPOLITAN ATLAS SERIES

A series of 12 publications covering Canada's major census metropolitan areas combine maps, graphs and text to present the 1986 Census data in an easy-to-understand format. Information on ethnic origin is included as well as a number of other key demographic, housing, social and economic themes. Maps summarize these complex statistics and pinpoint areas of concentration, facilitate comparisons and reveal changing patterns - helping us to better understand the cities we live in. Information is included for the following 12 large urban centres:

St. John's	(Cat. No. 98-101)
Halifax	(Cat. No. 98-102)
Québec	(Cat. No. 98-103)
Montréal	(Cat. No. 98-104)
Ottawa-Hull	(Cat. No. 98-105)
Toronto	(Cat. No. 98-106)
Hamilton	(Cat. No. 98-107)
Winnipeg	(Cat. No. 98-108)
Regina	(Cat. No. 98-109)
Calgary	(Cat. No. 98-110)
Edmonton	(Cat. No. 98-111)
Vancouver	(Cat. No. 98-112)

#### SÉRIE: LE CANADA À L'ÉTUDE

## Diversité ethnique au Canada (nº 98-132 au catalogue)

Cette étude met en relief l'évolution du profil ethnique des Canadiens et la répartition des principaux groupes ethniques. On y examine l'applicabilité, dans le cadre du Canada, des concepts de la mosaïque culturelle et du creuset des civilisations. On s'intéresse tout particulièrement aux personnes qui déclarent appartenir à plusieurs groupes ethniques. On analyse également le rôle joué par l'immigration.

#### SÉRIE D'ATLAS MÉTROPOLITAINS

Cette série de 12 publications, portant sur les principales régions métropolitaines de recensement du Canada, réunit des cartes, des graphiques et des textes et présente les données du recensement de 1986 sous une forme facile à comprendre. Des renseignements sur l'origine ethnique sont compris ainsi qu'un nombre de principales questions abordées, qu'elles soient démographiques, sociales ou économiques ou qu'elles touchent au logement. Des cartes présentent de façon synoptique ces statistiques complexes et permettent la délimitation des régions de concentration, facilitent les comparaisons et révèlent les tendances changeantes. Les utilisateurs ont ainsi une idée plus précise de leur ville. Ces renseignements sont compris pour les 12 grands centres urbains suivants:

St. John's Halifax Québec Montréal Ottawa-Hull Toronto Hamilton	(nº 98-101 au catalogue) (nº 98-102 au catalogue) (nº 98-103 au catalogue) (nº 98-104 au catalogue) (nº 98-105 au catalogue) (nº 98-106 au catalogue) (nº 98-107 au catalogue)
Winnipeg	(nº 98-108 au catalogue)
Regina	(nº 98-109 au catalogue)
Calgary	(nº 98-110 au catalogue)
Edmonton	(nº 98-111 au catalogue)
Vancouver	(nº 98-112 au catalogue)
Vancouver	(11° 50-112 au catalogue)

93-154

#### BASIC SUMMARY TABLES

This series is designed to meet the needs of users who wish to study the characteristics of small areas. Tables provide information on a variety of census variables. The following ethnic origin table is available:

EC86B01 Population by ethnic origin (21) and sex (3)

The table is produced for the following four geographic levels: (i) enumeration areas and federal electoral districts; (ii) census subdivisions (municipalities) and census divisions (counties); (iii) census tracts and provincial census tracts; (iv) Canada, provinces, territories and census metropolitan areas.

Data for the basic summary tables are available in machine-readable form to facilitate aggregation and manipulation.

#### OTHER RELATED PRODUCTS

#### **Census Products**

Counts of selected ethnic origins for census metropolitan areas can be obtained from a set of tabulations entitled "Summary Tabulations of Ethnic and Aboriginal Origins", December 1987. These tabulations contain more detailed distributions than can be obtained from the "Profile" series.

Also provided are data on aboriginal origins for the population living on and off Indian reserves and settlements, for Canada, provinces and territories.

Counts of selected ethnic origins for Canada, provinces and territories can be obtained from the "Addendum to the Daily", <u>The Daily</u>, December 3, 1987.

#### TABLEAUX SOMMAIRES DE BASE

Cette série est conçue pour répondre aux besoins des utilisateurs qui désirent étudier les caractéristiques des petites régions. Les tableaux donnent des renseignements sur une gamme de variables du recensement. Le tableau suivant sur l'origine ethnique est disponible:

EC86B01 Population selon l'origine ethnique (21) et le sexe (3)

Le tableau est produit pour les quatre régions géographiques suivantes: (i) secteurs de dénombrement et circonscriptions électorales fédérales; (ii) subdivisions de recensement (municipalités) et divisions de recensement (comtés); (iii) secteurs de recensement et secteurs de recensement provinciaux; (iv) Canada, provinces, territoires et régions métropolitaines de recensement.

Les données des tableaux sommaires de base sont disponibles sous forme lisible par machine pour faciliter l'agrégation et la manipulation des données.

#### **AUTRES PRODUITS CONNEXES**

#### Produits du recensement

Les chiffres sur certaines origines ethniques pour les régions métropolitaines de recensement peuvent être obtenus à partir d'une série de totalisations intitulées "Totalisations sommaires: origine ethnique et appartenance à la population autochtone", décembre 1987. Ces totalisations contiennent des répartitions plus détaillées que celles que l'on retrouve dans la série des profils.

Des données sur les origines de la population autochtone vivant dans les réserves indiennes ou établissements indiens et vivant hors des réserves indiennes ou établissements indiens sont également fournies pour le Canada, les provinces et les territoires.

Les chiffres sur certaines origines ethniques pour le Canada, les provinces et les territoires peuvent être obtenus de l'Addenda du Quotidien, Quotidien, le 3 décembre 1987.

#### REFERENCE PRODUCTS

Users, who may require assistance in understanding and interpreting the data and geographic concepts appearing in this set of tabulations, should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F). The Dictionary provides a range of definitions for all variables and terms used in 1986 Census data products.

Further details on the products and services available from the census are provided in the 1986 Census Products and Services – Final Edition (Catalogue No. 99-103E or F).

All users wishing to obtain more information about the range of census products available to serve their needs are invited to contact their nearest Statistics Canada Regional Office. A representative will be glad to help. Addresses and phone numbers are listed on page XLVII.

#### **SYMBOLS**

The following standard symbols are used in census publications:

- .. figures not available
- ... figures not appropriate or not applicable
- nil or zero
- -- amount too small to be expressed

#### PRODUITS DE RÉFÉRENCE

Les utilisateurs qui ont besoin d'aide pour comprendre et interpréter les données et les concepts géographiques figurant dans cette série de totalisations peuvent consulter le **Dictionnaire** du recensement de 1986 (n° 99-101F ou E au catalogue). Le dictionnaire donne les définitions de toutes les variables et de tous les termes utilisés dans les produits du recensement de 1986.

D'autres détails sur les produits et services du recensement sont fournis dans les **Produits** et services du recensement de 1986 - Version définitive (nº 99-103F ou E au catalogue).

Les utilisateurs qui désirent obtenir plus de précisions sur la gamme des produits du recensement adaptés à leurs besoins sont invités à communiquer avec le bureau régional de Statistique Canada le plus près. Un représentant sera heureux de vous aider. Les adresses et les numéros de téléphone sont donnés à la page LXXV.

#### SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications du recensement:

- .. nombres non disponibles
- ... n'ayant pas lieu de figurer
- néant ou zéro
- -- nombres infimes

REFERENCE MATERIAL

IN

**ENGLISH** 

# **DEFINITIONS**

The definitions of geographic terms and census concepts are presented here in summary form only. Users should refer to the 1986 Census Dictionary (Catalogue No. 99-101E or F) for the full definitions and additional remarks related to these concepts and definitions.

#### AGE

Refers to the age at last birthday (as of the census reference date, June 3, 1986). This variable is derived from the date of birth question which asks day, month and year of birth. Persons who were unable to give the exact date of birth were asked to give the best possible estimate.

# AGE AT IMMIGRATION

Refers to the age at which the respondent first immigrated to Canada.

It should be noted that the 1981 and 1986 questions address a slightly more restricted population (persons not Canadian citizens by birth) compared to 1971 (all persons born outside Canada). Due to processing restrictions, earlier censuses had only pre-defined periods of immigration which made it impossible to determine specific age at and year of immigration.

# AVERAGE EMPLOYMENT INCOME

Average employment income of individuals refers to the weighted mean total employment income of individuals 15 years of age and over who reported employment income for 1985. Average employment income is calculated from unrounded data by dividing the aggregate employment income of a specified group of individuals (e.g., males, 45-54 years of age) by the number of individuals with employment income in that group.

# AVERAGE INCOME OF INDIVIDUALS

Average income of individuals refers to the weighted mean total income of individuals 15 years of age and over who reported income for 1985. Average income is calculated from unrounded data by dividing the aggregate income of a specified group of individuals (e.g., males, 45-54 years of age) by the number of individuals with income in that group.

# CENSUS METROPOLITAN AREA (CMA)

The general concept of a census metropolitan area (CMA) is one of a very large urbanized core, together with adjacent urban and rural areas which have a high degree of economic and social integration with that core.

A CMA is defined as the main labour market area of an urban area (the urbanized core) of at least 100,000 population, based on the previous census. Once an area becomes a CMA, it is retained in the program even if its population subsequently declines.

Smaller labour market areas, centred on urbanized cores of at least 10,000 population, are included in the census agglomeration (CA) program.

CMAs are comprised of one or more census subdivisions (CSDs) which meet at least one of the following criteria:

- (1) the CSD falls completely or partly inside the urbanized core;
- (2) at least 50% of the employed labour force <u>living</u> in the CSD <u>works</u> in the urbanized core; or
- (3) at least 25% of the employed labour force working in the CSD lives in the urbanized core.

#### CITIZENSHIP

Refers to the legal citizenship status of the respondent. Persons who are citizens of more than one country were instructed to indicate this fact.

In 1971, the respondent was asked to indicate his/her country of citizenship and specific countries were coded. In 1981 and 1986, this coding operation was eliminated. Citizenship data for specific countries are available by cross-classifying place of birth and citizenship.

#### **EMPLOYED**

Refers to persons who, during the week prior to June 3, 1986:

- (a) did any work at all excluding housework or other maintenance or repairs around the home and volunteer work; or
- (b) were absent from their job or business because of own temporary illness or disability, vacation, labour dispute at their place of work, or were absent for other reasons.

Data are available for persons 15 years of age and over, excluding institutional residents.

#### EMPLOYMENT INCOME

Refers to total income received by persons 15 years of age and over during 1985 as wages and salaries, net income from non-farm self-employment and/or net farm income as defined below.

# (a) Wages and Salaries

Refers to gross wages and salaries before deductions for such items as income tax, pensions, unemployment insurance, etc. Included in this source are military pay and allowances, tips, commissions, cash bonuses as well as all types of casual earnings in calendar year 1985. The value of taxable allowances and benefits provided by employers such as free lodging, free automobile use, etc., is excluded.

# (b) Net Non-farm Self-employment Income

Refers to net income (gross receipts minus expenses of operation such as wages, rents, depreciation, etc.) received during calendar year 1985 from the respondent's non-farm unincoporated business or professional practice. In the case of a partnership, only the respondent's share was to be reported. Also included is net income from persons babysitting in their own homes, operators of direct distributorships such as selling and delivering cosmetics, as well as from free-lance activities of artists, writers, music teachers, hairdressers, dressmakers, etc.

# (c) Net Farm Self-employment Income

Refers to net income (gross receipts from farm sales minus depreciation and cost of operation) received during calendar year 1985 from the operation of a farm, either on own account or in partnership. In the case of partnerships, only the respondent's share of income was to be reported. Also included are advance, supplementary or assistance payments to farmers by federal or provincial governments. However, the value of income "in kind", such as agricultural products produced and consumed on the farm is excluded.

# ETHNIC ORIGIN

Refers to the ethnic or cultural group(s) to which the respondent or the respondent's ancestors belong. Ethnic or cultural group refers to the "roots" or ancestral origin of the population and should not be confused with citizenship or nationality.

It should be noted that prior to the 1981 Census, only the respondent's paternal ancestry was to be reported. If multiple ethnic origins were reported, only one origin was captured, resulting in one ethnic origin per respondent. In 1981, this restriction was removed, allowing for multiple ethnic origins. One write-in was provided on the 1981 questionnaire, in addition to the mark boxes. The 1986 Census questionnaire allows respondents to write in up to three ethnic origins not included in the mark boxes. This increases the number of multiple response possibilities.

The 1986 question was changed slightly from that asked in the 1981 Census. In 1981, respondents were asked, "To which ethnic or cultural group did you or your ancestors belong on first coming to this continent?" The phrase "on first coming to this continent" was removed from the 1986 question. The 1986 ethnic origin question was: "To which ethnic or cultural group(s) do you or did your ancestors belong?"

#### EXPERIENCED LABOUR FORCE

Derived by deleting from the total labour force those unemployed persons 15 years of age and over who have never worked or who had worked only prior to January 1, 1985.

# FULL-TIME OR PART-TIME WEEKS WORKED IN 1985

Refers to persons who worked in 1985. These persons were asked to report whether the weeks they worked in 1985 were full weeks of work or not. Persons with a part-time job for part of the year and a full-time job for another part of the year were to report the information for the job at which they worked the most weeks. Data are available for persons 15 years of age and over who worked in 1985, excluding institutional residents.

# **HOME LANGUAGE**

Refers to the language spoken at home by the individual at the time of the census. If more than one language was spoken, the language spoken most often by the individual was to be reported.

In 1986, the following instructions were provided to respondents:

"You should report the language you yourself speak most often at home. If you are answering for someone else, report the language that he/she speaks most often.

If you speak two languages equally often, report both.

For a child who has not yet learned a language, report the language spoken most often at home. If two languages are used equally often, report both.

If you are mute, report the language you use most often at home to make yourself understood.

If you live alone, report the language in which you feel most comfortable.

Persons who speak an Indian language (from India) should not report Indian but rather Hindi, Urdu, Punjabi or some other language as applicable. Persons who speak an Amerindian language (North American Indian) should report Cree, Ojibway or some other Amerindian language as applicable."

# INDIAN RESERVE

Refers to land, the legal title to which is vested in Her Majesty, that has been set apart for the use and benefit of an Indian band and that is subject to the terms of the Indian Act. Since it is generally excluded from local jurisdiction and is administered by the Federal Department of Indian and Northern Affairs Canada (INAC), it is classified as a census subdivision (CSD) by Statistics Canada.

# INDIAN SETTLEMENT

Refers to places, identified by the Federal Department of Indian and Northern Affairs Canada (INAC) for statistical purposes only, where a self-contained group of at least 10 Indian people reside more or less permanently. Indian settlements are usually located on Crown lands

under federal or provincial jurisdiction. They have not been set apart for the use and benefit of an Indian band as is the case with Indian reserves.

# INDUSTRY (BASED ON THE 1980 CLASSIFICATION)

Refers to the general nature of the business carried out in the establishment where the person worked, as indicated by the name of the employer and the kind of business, industry or service. Data are available for persons 15 years of age and over, excluding institutional residents. If not employed in the week prior to enumeration, the information relates to the job of longest duration since January 1, 1985. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Census industry data based on the 1980 Standard Industrial Classification have three levels of aggregation. There are 18 divisions (labelled A to R) which are subdivided into 75 major groups, which are, in turn, subdivided into 296 detailed groups.

Direct comparisons between 1986, 1981 and 1971 Census industry data are possible, based on the 1970 SIC. For further information refer to the definition of INDUSTRY (based on the 1970 classification) in the 1986 Census Dictionary (Cat. No. 99-101E).

#### INSTITUTIONAL RESIDENT

Refers to a resident of an "institutional" collective dwelling, other than staff members and their families.

"Institutional" collective dwellings are orphanages and children's homes, special care homes and institutions for the elderly and chronically ill, hospitals, psychiatric institutions, treatment centres and institutions for the physically handicapped, correctional and penal institutions, young offenders facilities and jails.

# LABOUR FORCE ACTIVITY

Refers to the labour market activity of the working age population who, in the week prior to June 3, 1986, were <u>employed</u> or <u>unemployed</u>. The remainder of the working age population is classified as <u>not in labour force</u>. Data are available for persons 15 years of age and over, excluding institutional residents.

#### MARITAL STATUS

Refers to the conjugal status of a person.

# Now married (excluding separated)

Persons whose husband or wife is living, unless the couple is separated or a divorce has been obtained. Persons living common-law are considered as "Now married".

# Separated

Persons who have been deserted or who have parted because they no longer want to live together, but have not obtained a divorce.

# Divorced

Persons who have obtained a legal divorce and who have not remarried.

# Widowed

Persons who have lost their spouse through death and who have not remarried.

# Never married (single)

Persons who have never married (including all persons less than 15 years of age) and persons whose marriage was annulled.

#### MEDIAN INCOME OF INDIVIDUALS

The median income of a specified group of individuals is that amount which divides their income size distribution into two halves, i.e. the incomes of the first half of individuals are below the median, while those of the second half are above the median.

# MOTHER TONGUE

Refers to the first language learned in childhood and still understood by the individual at the time of the census.

In 1986, the following instructions were provided to respondents:

"You should report the first language you learned in childhood, that is, before you went to school. If you no longer understand that language, report the second language you learned. If you are answering for someone else, report the first language that he/she learned in childhood.

If you understand more than one language, report the one you learned first. If you learned two languages at the same time, report the language you yourself spoke most often at home. If you used the two languages equally often, report both.

For a child who has not yet learned a language, report the language he/she will first be learning at home. If he/she is learning two languages at the same time, report the one in which he/she is spoken to most often. If the two languages are used equally often, report both.

Persons who speak an Indian language (from India) should not report Indian but rather Hindi, Urdu, Punjabi or some other language as applicable. Persons who speak an Amerindian language (North American Indian) should report Cree, Ojibway or some other Amerindian language as applicable."

#### NOT IN LABOUR FORCE

The Not in Labour Force classification refers to those persons, who, in the week prior to enumeration, were unwilling or unable to offer or supply their labour services under conditions existing in the labour market. It includes persons who looked for work during the last four weeks but who were not available to start work in the reference week, as well as persons who did not work, did not have a new job to start in four weeks or less, were not on temporary lay-off or did not look for work in the four weeks prior to enumeration. Data are available for persons 15 years of age and over, excluding institutional residents.

# OCCUPATION (BASED ON 1980 CLASSIFICATION)

Refers to the kind of work persons were doing during the reference week, as determined by their reporting of their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 1985. Persons with two or more jobs were to report the information for the job at which they worked the most hours.

Occupation data are based on a classification structure composed of three levels of aggregation. There are 22 major groups which are subdivided into 80 minor groups. These, in turn, contain a total of 514 detailed occupations.

Direct comparisons of 1981 and 1986 occupation data are possible. For comparison with 1971 Census data, adjustments must be made to the universe and classification. For further information, refer to the definition of OCCUPATION (based on 1971 classification) in the 1986 Census Dictionary (Cat. No. 99-101E).

### OFFICIAL LANGUAGE

Refers to the ability to conduct a conversation in English and French, the official languages of Canada.

It should be emphasized that the official language question data are based on the individual's own assessment of his or her abilities.

In 1986, the following instructions were provided to respondents:

"Do not report French or English learned at school unless you can conduct a conversation of some length on various topics in that language.

For a child who has not yet learned a language, report the language spoken most often at home if it is either English or French. If the two languages are used equally often, report "English and French". If neither language is used often, mark "Neither English nor French".

If you are mute, report English, French or both provided you are able to make yourself understood in one or both of these languages."

# PARTICIPATION RATE

Refers to the total labour force (in reference week) expressed as a percentage of the total population 15 years of age and over, excluding institutional residents, in an area, group or category.

# PERIOD OF IMMIGRATION

Refers to groupings of years derived from year of immigration reported by persons who are not Canadian citizens by birth.

It should be noted that the 1981 and 1986 questions address a slightly more restricted population (persons not Canadian citizens by birth) compared to 1971 (all persons born outside Canada). Due to processing restrictions, earlier censuses had only pre-defined periods of immigration which made it impossible to determine specific age at and year of immigration.

# PLACE OF BIRTH

Refers to specific provinces if born in Canada, or to specific countries if born outside Canada. Respondents were asked to indicate their place of birth according to boundaries at the census date.

#### **PROVINCE**

Refers to the major political division of Canada. From a statistical point of view, it is a basic unit for which data are tabulated and cross-classified. In census publications, provincial tables include the Yukon Territory and the Northwest Territories.

### SCHOOLING: HIGHEST LEVEL OF

Refers to the highest grade or year of elementary or secondary school attended, or the highest year of university or other non-university completed. University education is considered to be above other non-university. Also, the attainment of a degree, certificate or diploma is considered to be at a higher level than years completed or attended without an educational qualification.

# SCHOOLING: MAJOR FIELD OF STUDY (MFS)

Refers to the predominant discipline or area of learning or training of a person's highest postsecondary degree, certificate or diploma. The major field of study classification structure consists of 10 broad or major categories - educational, recreational and counselling services; fine and applied arts; humanities and related fields; social sciences and related fields; commerce, management and business administration; agricultural and biological sciences/technologies; engineering and applied sciences; engineering and applied science technologies and trades; health professions, sciences and technologies; and mathematics and physical sciences. This structure is, in turn, subdivided into over 100 "minor" classification categories and over 425 "unit" groups.

#### SEX

Refers to the gender of the respondent.

#### SOURCES OF INCOME

All persons 15 years or over were asked to report their total money income from the following sources during the calendar year 1985:

### (a) Wages and Salaries

Refers to gross wages and salaries before deductions for such items as income tax, pensions, unemployment insurance, etc. Included in this source are military pay and allowances, tips, commissions, cash bonuses as well as all types of casual earnings in calendar year 1985. The value of taxable allowances and benefits provided by employers such as free lodging, free automobile use, etc., is excluded.

### (b) Net Non-farm Self-employment Income

Refers to net income (gross receipts minus expenses of operation such as wages, rents, depreciation, etc.) received during calendar year 1985 from the respondent's non-farm unincorporated business or professional practice. In the case of a partnership, only the respondent's share was to be reported. Also included is net income from persons baby-sitting in their own homes, operators of direct distributorships such as selling and delivering cosmetics, as well as from free-lance activities of artists, writers, music teachers, hair-dressers, dressmakers, etc.

#### (c) Net Farm Self-employment Income

Refers to net income (gross receipts from farm sales minus depreciation and cost of operation) received during calendar year 1985 from the operation of a farm, either on own account or in partnership. In the case of partnerships, only the respondent's share of income was to be reported. Also included are advance, supplementary or assistance payments to farmers by federal or provincial governments. However, the value of income "in kind", such as agricultural products produced and consumed on the farm is excluded.

# (d) Old Age Security Pension and Guaranteed Income Supplement

Refers to Old Age Security pensions and Guaranteed Income Supplements paid to persons 65 years of age and over, and Spouses' Allowances paid to 60 to 64 year-old spouses of Old Age Security recipients by the federal government only during calendar year 1985. Also included are Extended Spouses' Allowances paid to 60 to 64 year-old widows/widowers whose spouse was an Old Age Security pension recipient.

### (e) Benefits from Canada/Quebec Pension Plan

Refers to benefits received in calendar year 1985 under the Canada or Quebec Pension Plan, e.g., retirement pensions, survivors' benefits, disability pensions. Does not include retirement pensions of civil servants, RCMP and military personnel or lump-sum death benefits.

### (f) Family Allowances

Federal as well as provincial allowances paid during calendar year 1985 in respect of children under 18 years of age are included. These allowances, though not collected directly from the respondents, were calculated and included in the income of one of the parents.

# (g) Federal Child Tax Credits

Federal child tax credits paid during calendar year 1985 in respect of children under 18 years of age are included. These credits, though not collected directly from the respondents, were calculated and included in the income of one of the parents.

#### (h) Benefits from Unemployment Insurance

Refers to total unemployment insurance benefits received in calendar year 1985, before income tax deductions. It includes benefits for sickness, maternity, fishing, work sharing, retraining and retirement received under the Federal Unemployment Insurance program.

#### (i) Other Income from Government Sources

Refers to all transfer payments, excluding those covered as a separate income source (Family Allowances, Federal Child Tax Credits, Old Age Security pensions and Guaranteed Income Supplements, Canada/Quebec Pension Plan benefits and Unemployment Insurance benefits) received from federal, provincial or municipal programs in calendar year 1985. This source includes transfer payments received by persons in need such as mothers with dependent children, persons temporarily or permanently unable to

work, elderly individuals, the blind and the disabled. Included are provincial income supplement payments to seniors to supplement Old Age Security and Guaranteed Income Supplement and provincial payments to seniors to help offset accommodation costs. Also included are other transfer payments such as for training under the National Training Program (NTP), veterans' pensions, war veterans' allowance, pensions to widows and dependants of veterans. workers' compensation, etc. Additionally, provincial tax credits and allowances claimed on the income tax return are included.

### (j) Dividends and Interest on Bonds, Deposits and Savings Certificates and Other Investment Income

Refers to interest received in calendar year 1985 from deposits in banks, trust companies, co-operatives, credit unions, caisses populaires, etc., as well as interest on savings certificates, bonds and debentures and all dividends from both Canadian and foreign stocks. Also included is other investment income from either Canadian or foreign sources such as net rents from real estate, mortgage and loan interest received, regular income from an estate or trust fund, and interest from insurance policies.

# (k) Retirement Pensions, Superannuation and Annuities

Refers to all regular income received during calendar year 1985 as the result of having been a member of a pension plan of one or more employers. It includes payments received from all annuities, including payments from a matured registered retirement savings plan (RRSP) in the form of a life annuity, a fixed term annuity, a registered retirement income fund or an income-averaging annuity contract; pensions paid to widows or other relatives of deceased pensioners; pensions of retired civil servants, Armed Forces personnel and RCMP officers; annuity payments received from the Canadian Government Annuities Fund, an insurance company, etc. Does not include lump-sum death benefits, lump-sum benefits or withdrawals from a pension plan or RRSP or refunds of over contributions.

### (l) Other Money Income

Refers to regular cash income received during calendar year 1985 and not reported in any of the other nine sources listed on the questionnaire, e.g., alimony, child support, periodic support from other persons not in the household, net income from roomers and boarders, income from abroad (except dividends and interest), non-refundable scholarships and bursaries, severance pay, royalties, strike pay.

# Receipts Not Counted as Income

Gambling gains and losses, money inherited during the year in a lump sum, capital gains or losses, receipts from the sale of property or personal belongings, income tax refunds, loans received, loans repaid to an individual as the lender, lump sum settlements of insurance policies, rebates of property taxes and other taxes, and refunds of pension contributions were excluded as well as all income in kind such as free meals, living accommodation, or agricultural products produced and consumed on the farm.

#### **Total Income**

Total income is the sum of amounts received during 1985 by an income recipient from the sources of income listed above.

# STANDARD ERROR OF AVERAGE EMPLOYMENT INCOME

Refers to the estimated standard error of average employment income. It is an estimate of the error introduced into these data due to the fact that they are collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that for a group of individuals 15 years and over (e.g., males, 45-54 years of age), the true value (the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error and virtually certain that it lies within plus or minus three times the standard error. These estimates do not include the effects of certain types of response error or systematic or coverage errors.

# STANDARD ERROR OF AVERAGE INCOME

Refers to the estimated standard error of average income. It is an estimate of the error introduced into these data due to the fact that they are collected only from a one in five random sample of households. When using these figures, the user can be reasonably certain that for a group of individuals 15 years and over (e.g., males, 45-54 years of age), the true value (the value that would have been obtained had sampling not been used) lies within plus or minus twice the standard error

and virtually certain that it lies within plus or minus three times the standard error. These estimates do not include the effects of certain types of response error or systematic or coverage errors.

# TOTAL INCOME (see "Sources of Income")

# TOTAL LABOUR FORCE (IN REFERENCE WEEK)

Refers to persons who were either employed or unemployed during the week prior to enumeration (June 3, 1986). Data are available for persons 15 years of age and over, excluding institutional residents.

#### UNEMPLOYED

Refers to persons who, during the week prior to enumeration:

- (a) were without work, had actively looked for work in the past four weeks and were available for work; or
- (b) had been on lay-off and expected to return to their job; or
- (c) had definite arrangements to start a new job in four weeks or less.

Data are available for persons 15 years of age and over, excluding institutional residents.

#### UNEMPLOYMENT RATE

Refers to the unemployed labour force expressed as a percentage of the total labour force (in reference week) in an area, group, or category. Data are available for persons 15 years of age and over, excluding institutional residents.

#### **WEEKS WORKED IN 1985**

Refers to the number of weeks in 1985 during which a person worked even if for only a few hours. It includes weeks of vacation or sick leave with pay or paid absence on training courses. "Work" excludes housework or other maintenance or repairs around the home and volunteer work. Data are available for persons 15 years of age and over, excluding institutional residents.

#### **WORK ACTIVITY IN 1985**

Refers to the number of weeks which a person worked in 1985 and whether these weeks worked were full time or part time. Data are available for persons 15 years of age and over, excluding institutional residents.

#### YEAR OF IMMIGRATION

Refers to the year of first immigration to Canada reported by persons who are not Canadian citizens by birth.

It should be noted that the 1981 and 1986 questions address a slightly more restricted population (persons not Canadian citizens by birth) compared to 1971 (all persons born outside Canada). Due to processing restrictions, earlier censuses had only pre-defined periods of immigration which made it impossible to determine specific age at and year of immigration.

### SAMPLING AND WEIGHTING

The 1986 Census data were collected either on a 100% basis (i.e. for all households) or on a sample basis (i.e. from only a random sample of households) with data weighted to provide estimates of the entire population. The information in this report was collected on a 20% sample basis and weighted up to compensate for sampling. All table headings are noted accordingly. (Note that, on Indian reserves and in remote areas, all data were collected on a 100% basis. In the Northwest Territories, data were collected on a 100% basis but, for the communities of Fort Smith, Hay River, Pine Point and Yellowknife, the data were processed on a 20% basis.)

For any given geographic area, the weighted population, household, dwelling or family, total or subtotal may differ from that shown in reports containing data collected on a 100% basis. Such variation (in addition to the effect of random rounding) will be due to sampling.

# **DATA QUALITY**

#### **GENERAL**

The 1986 Census was a large and complex undertaking and, while considerable effort was taken to ensure high standards throughout all collection and processing operations, the resulting estimates are inevitably subject to a certain degree of error. Users of census data should be aware such error exists, and have some appreciation of its main components, so that they can assess the usefulness of census data for their purposes and the risks involved in basing conclusions or decisions on these data.

Errors can arise at virtually every stage of the census process from the preparation of materials, through the listing of dwellings and data collection to processing. Some errors occur more or less at random, and when the individual responses are aggregated for a sufficiently large group, such errors tend to cancel out. For errors of this nature. the larger the group, the more accurate the corresponding estimate. It is for this reason that users are advised to be cautious when using small estimates. There are some errors, however, which might occur more systematically, and which result in "biased" estimates. Because the bias from such errors is persistent no matter how large the group for which responses are aggregated, and because bias is particularly difficult to measure, systematic errors are a more serious problem for most data users than the random errors referred to previously.

For census data in general, the principal types of error are as follows:

- coverage errors, which occur when dwellings and/or individuals are missed, incorrectly included or double counted;
- non-response errors, which result from the fact that responses cannot be obtained from a small number of households and/or individuals, because of extended absence or some other reason:
- response errors, which occur when the respondent, or sometimes the Census Representative, misunderstands a census question, and records an incorrect response;
- processing errors, which can occur at various steps including: coding, when "write-in" responses are transformed into numerical codes by clerks; data capture, when responses are transferred from the census questionnaire to computer tapes by key-entry operators; and imputation, when a "valid", but not necessarily correct, response is inserted into a record by the computer to replace missing or "invalid" data ("valid" and "invalid" referring to whether or not the response is consistent with other information on the record);

- sampling errors, which apply only to the supplementary questions on the "long form" asked of a one-fifth sample of households, and which arise from the fact that the results for these questions, when weighted up to represent the whole population, inevitably differ somewhat from the results which would have been obtained if these questions had been asked of all households.

The above types of error each have both random and systematic components. Usually, however, the systematic component of sampling error is very small in relation to its random component. For the other non-sampling errors, both random and systematic components may be significant.

#### **COVERAGE ERRORS**

Coverage errors affect the accuracy of the census counts, that is the sizes of the various census universes: population, families, households and dwellings. While steps have been taken to correct certain identifiable errors, the final counts are still subject to some degree of error resulting from persons or dwellings being missed, incorrectly included in the census or double counted.

Missed dwellings or persons result in undercoverage. Dwellings can be missed because of misunderstanding of enumeration area (EA) boundaries, or because dwellings are hidden or appear uninhabitable. Persons can be missed when their dwelling is missed or classified as vacant, or when individual household members are omitted from the questionnaire because the respondent misinterprets the instructions on whom to include. Some individuals may be missed because they have no usual residence and did not spend census night in any dwelling.

Dwellings or persons that are incorrectly included or double counted result in overcoverage. Overcoverage of dwellings can occur when structures unfit for habitation are listed as dwellings, or when units which do not meet the census definition of a dwelling are listed separately, instead of being treated as part of a larger dwelling. Double counting of dwellings can occur, for example, because of ambiguity over EA boundaries. Persons can be double counted because their dwelling is double counted or because the guidelines on whom to include on the questionnaire have been misunderstood. Occasionally, someone who is not a Canadian resident may, incorrectly, be enumerated in the census. On average, overcoverage is less likely to occur than undercoverage and, as a result, counts of dwellings and persons are likely to be slightly underestimated.

93-154

In 1986, four studies were undertaken to measure different aspects of coverage error. First, a sample of dwellings listed as vacant were revisited to verify that they really were vacant on Census Day. Adjustments have been made to the final census counts for households missed because their dwelling was incorrectly classified as vacant. Secondly, a sample of persons enumerated as temporary residents was selected to verify whether or not they were enumerated at their usual place of residence. Based on this sample, estimates were obtained of the number of persons missed because they were temporarily absent from their usual place of residence. Corresponding adjustments were made to the final population counts. Despite these adjustments, the final counts are still subject to some undercoverage. For Canada as a whole and for each province, the magnitude of this residual undercoverage in the 1986 Census is being measured by means of a special study known as the Reverse Record Check. Undercoverage tends to be higher for certain segments of the population such as young adult males and recent immigrants. Undercoverage is offset to some degree by overcoverage errors, and in 1986 for the first time a special study was carried out to investigate overcoverage errors.

#### OTHER NON-SAMPLING ERRORS

While coverage errors affect the number of units in the various census universes, other errors affect the characteristics of those units.

Sometimes, it is not possible to obtain a complete response from a household, even though the dwelling was identified as occupied and a questionnaire dropped off. The household members may have been away throughout the census period or, in rare instances, the householder may have refused to complete the form. More frequently, the questionnaire is returned but information is missing for some questions or individuals. Considerable effort is devoted to ensuring as complete a response as possible. Census Representatives edit the questionnaires and follow up any missing information. The Census Representative's work is then checked by both a supervisor and a quality control technician. Despite this, at the end of the collection stage, a small number of responses are missing. Although missing entries are eliminated during processing. there remains some potential non-response error. This is particularly serious if the non-respondents differ in some respects from the respondents since, as described in a later paragraph, a missing value is replaced by the corresponding entry for a "similar" record. If respondents and nonrespondents differ in terms of the characteristics involved, this procedure will result in non-response bias.

Even when a response is obtained, it may not be entirely accurate. The respondent may have misinterpreted the question or may have guessed the answer, especially when answering on behalf of another, possibly absent, household member. Such errors are referred to as response errors. While response errors usually arise from inaccurate information provided by respondents, they can also result from mistakes by the Census Representative when completing certain parts of the questionnaire such as structural type of dwelling, or when calling back to obtain a missing response.

Some of the questions on the census document require a verbal response to be written in. During regional processing, these "write-in" entries are given a numeric code. <u>Coding errors</u> can occur, especially when the code list is extensive (as with, for example, language, ethnic origin, industry and occupation), and when the written response is ambiguous, incomplete or difficult to read. Coding errors are controlled, though not completely eliminated, by verifying a sample of each coder's work and taking corrective action where necessary.

After the coding and certain other manual processing steps are complete, the information on the questionnaires is key-entered onto a computer file. Two procedures are used to control the number of <u>data capture errors</u>. First, certain edits (such as range checks) are performed as the data are keyed. Secondly, a sample from each batch of documents is re-keyed and compared with the original entries. If there is more than a specified number of errors among the original entries, the whole batch is re-keyed.

Once the data have been captured, they are sent to Ottawa where they undergo a series of computer checks to identify missing or inconsistent responses. In the case of inconsistent responses, it has first to be decided which response is to be considered invalid. Invalid or missing responses must then be replaced by valid responses, that is, responses which are consistent with other data on the record. For a small proportion of cases, the correct response can be inferred from other data on the record. In most cases, however, this is not possible and a valid response is obtained from a "donor" record selected at random from among a group of consistent records which are similar to the invalid record in terms of a number of related characteristics. There is, of course, no guarantee that the imputed value will necessarily be the correct response for the individual concerned. However, provided the missing or invalid records are similar, on average, to the valid records, any imputation errors will more or less cancel out when results are tabulated for a sufficiently large geographical area or subgroup of the population.

Various studies are being carried out to evaluate the quality of the responses obtained in the 1986 Census. For each question, response rates and edit failure rates have been calculated. These can be useful in identifying the potential for non-response and other errors. Also, tabulations from the 1986 Census have been or will be compared with corresponding estimates from previous censuses, from sample surveys (such as the Labour Force Survey) and from various administrative records (such as birth registrations and municipal assessment records). Such comparisons can indicate potential quality problems or at least discrepancies between the sources.

In addition to these aggregate-level comparisons, there are some micromatch studies in progress, in which census responses are compared with another source of information at the individual record level. For certain "stable" characteristics (such as age, sex, mother tongue, place of birth, etc.), the responses obtained in the 1986 Census, for a sample of individuals, are being compared with those for the same individuals in the 1981 Census. Also, following the 1986 Census, a sample of persons was re-enumerated, primarily to determine overcoverage rates. At the same time, however, interviewers asked a series of detailed questions on language, ethnic origin and structural type of dwelling, the responses to which will be compared with the corresponding census responses in order to identify, and hopefully understand, response errors.

#### **SAMPLING ERRORS**

Estimates obtained by weighting up responses collected on a sample basis are subject to error due to the fact that the distribution of characteristics within the sample will not usually be identical to the distribution of characteristics within the population from which the sample has been selected.

The potential error introduced by sampling will vary according to the relative scarcity of the characteristics in the population. For large cell values the potential error due to sampling, as a proportion of the cell value, will be relatively

small. For small cell values this potential error, as a proportion of the cell value, will be relatively large.

The potential error due to sampling is usually expressed in terms of the so called "standard error". This is the square root of the average, taken over all possible samples of the same size and design, of the squared deviation of the sample estimate from the value for the total population.

The table below provides approximate measures of the standard error due to sampling. These measures are intended as a general guide only.

Users wishing to determine the approximate error due to sampling for any given cell of data, based upon the 20% sample, should choose the standard error value in the column of the standard error table whose heading is closest to the value of the given cell in the census tabulation. When using the obtained standard error value, in general the user can be reasonably certain that, for the enumerated population, the true value (discounting all forms of error other than sampling) lies within plus or minus three times the standard error (e.g., for a cell value of 1,000 the range would be 1,000 + or - 3X65 or 1,000 + or - 195).

The standard errors given in the table below will not apply to population or universe (persons, households, dwellings or families) totals or subtotals for the geographic area under consideration (see Sampling and Weighting). The effect of sampling for these cells can be determined by comparison with a corresponding 100% publication.

The effect of the particular sample design and weighting procedure used in the 1986 Census will vary, however, from one characteristic to another and from one geographic area to another. The standard error values in the table below may, therefore, understate or overstate the error due to sampling.

For further information on the quality of census data, contact Social Survey Methods Division at Statistics Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

Table: Approximate Standard Error Due to Sampling for 1986 Census Sample Data

Cell Value												
Approximate Standard Error	50	100	200	500	1,000	2,000	5,000	10,000	20,000	50,000	100,000	500,000
	15	20	30	45	65	90	140	200	280	435	600	1,300

# CONFIDENTIALITY AND RANDOM ROUNDING

The figures shown in this report have been subjected to a confidentiality procedure known as "random rounding" to prevent the possibility of associating small figures with any identifiable individual. Under this method, all figures including totals are randomly rounded (either up or down) to a multiple of "5". This technique provides strong protection against direct, residual or negative disclosures without adding significant error to the census data. However, since totals are independently rounded, they do not necessarily equal the sum of individual rounded figures in distributions. Also, minor differences can be expected for corresponding totals and cell values in various census tabulations. Similarly, percentages, which are calculated on rounded figures, do not necessarily add to 100. Percentage distributions and rates for the most part are based on rounded data, while percentage changes and averages are based on unrounded data.

Of concern to some users is that small cell counts may suffer a significant distortion as a result of random rounding. This distortion is the protection against disclosure and individual data cells containing these small numbers may lose their precision as a result. Since the rounding is of a random nature, however, when data cells are reaggregated by the user, the rounding errors tend to cancel out. Distortions may be further reduced by building in the appropriate subtotals into tabulations. Also available is the option of requesting custom tabulations from the census microdata bases. With custom products, random rounding occurs after data cells have been aggregated thus minimizing any distortion.

In addition to random rounding, procedures such as area and cell suppression have been adopted to further protect the confidentiality of individual responses.

With area suppression, all characteristic data for the geographic area are deleted and replaced with the symbol (XXX). The extent to which data are suppressed depends upon whether the area is a standard geographic area, i.e. aggregated from enumeration areas (federal electoral districts, census divisions, census subdivisions, census tracts, etc.) or a non-standard area specified by the user for a custom tabulation. Data are deleted if the population is less than 40 persons for standard areas and less than 100 persons for non-standard areas. For tables involving income distributions, the suppression of data is extended to geographic areas with a total population of less than 250. Suppressed data are, however, included in the

appropriate higher aggregate subtotals and totals. This technique is being implemented for all products involving subprovincial data (i.e. Profile series, basic summary data products, semi-custom and custom data products) collected on a 100% or 20% sample basis.

Note: For data collected on a 20% sample basis, area suppression is based on the non-institutional population rather than the total population since sample data were not collected for the institutional population.

With cell suppression, the minimum acceptable value for a cell is specified. All cell values below the designated cut-off are deleted and replaced by the symbol (XXX). However, the suppressed data are included in the appropriate higher aggregate subtotals and totals. For 1986 data products, two different methods of cell suppression are being implemented. For publications in "The Nation" and "Dimensions" series involving income, detailed occupation or detailed industry, the distribution is being suppressed where less than 250 persons or units are involved. In semi-custom and custom tabulations of variables collected on a sample basis, all cells with a value of "5" (after random rounding) are being suppressed.

#### SPECIAL NOTES

# POPULATION COUNTS BASED ON USUAL RESIDENCE

The population counts shown here for a particular area represent the number of Canadians whose usual place of residence is in that area, regardless of where they happened to be on Census Day. Also included are any Canadians staying in a dwelling in that area on Census Day and having no usual place of residence elsewhere in Canada. In most areas, there is little difference between the number of usual residents and the number of people staying in the area on Census Day. For certain places, however, such as tourist or vacation areas, or those including large work camps, the number of people staying in the area at any particular time could significantly exceed the number of usual residents shown here.

# INCOMPLETELY ENUMERATED INDIAN RESERVES AND INDIAN SETTLEMENTS

On some Indian reserves and Indian settlements in the 1986 Census, enumeration was not permitted or was interrupted before it could be completed.

Data for 1986 are therefore not available for the incompletely enumerated reserves and settlements and are not included in tabulations. Data for geographic areas containing one or more of these reserves or settlements are therefore noted accordingly. Because of the missing data, users are cautioned that for affected geographic areas, comparisons (e.g., percentage change) between 1981 and 1986 are not exact. While for higher level geographic areas (Canada, provinces, census metropolitan areas and census agglomerations) the impact of the missing data is very small, the impact can increase for smaller areas containing a larger proportion of affected reserves and settlements.

While it is not possible to estimate the population of each incompletely enumerated reserve, estimates of the missed total population and total occupied dwellings at the provincial level have been made and are shown in Appendix 1.

Note, however, that it was not possible to estimate any characteristics of the missed population, even at the provincial level.

Additional information on this subject can be obtained by referring to the User Information Bulletin, Number 1, "Summary of the Methodology for Estimating the Population and Occupied Private Dwellings on Incompletely Enumerated Indian Reserves".

# COMPARABILITY AND QUALITY OF DATA ON LANGUAGE

Comparison between 1981 and 1986

Mother tongue and home language. The language questions were the same in the last two censuses, but the instructions to respondents were modified for mother tongue and home language. In 1981, respondents were asked to indicate only one mother tongue and only one home language; nevertheless, 597,980 persons (2.5% of the population) reported more than one mother tongue and 535,735 persons (2.2% of the population) reported more than one home language.

To better reflect the linguistic reality in Canada, these instructions were dropped from the 1986 Census. Under the new guidelines, individuals could report more than one mother tongue if they had learned them at the same time and had spoken one as frequently as the other when they were children. Similarly, respondents could indicate more than one home language if they were now speaking them equally often at home.

The number of multiple responses given in the 1986 Census was significantly higher than in the 1981 Census. In 1986, 954,940 persons or 3.8% of the population reported a multiple response to the mother tongue question, while 1,159,675 or 4.6% of the population indicated more than one home language.

This increase was the result either of the changes made in the questionnaire, of changes in the way in which the population answers language questions or of an increase in the number of persons who had more than one mother tongue or spoke more than one language at home. A combination of these factors may also explain the increase in multiple responses.

When the 1981 data were processed, only one language was retained for publication, even in cases where the respondent reported more than one. In 1986, responses indicating more than one language were accepted.

In order to facilitate the determination of the trends between the two censuses, the 1986 Census results have been adjusted. In cases where more than one language was reported, the multiple responses were distributed among the component languages in the same proportions as in the 1981 Census. The results have been published in a special document entitled "Adjusted Language Data", April (1988). Also, data from the 1981 Census have been adjusted to show the multiple responses reported at that time. The data are presented in Table 4 of publications 93-102 (mother tongue) and 93-103 (home language). These adjustments to the mother tongue and home language figures make it easier to relate the 1986 data to the 1981 data, but do not make the results of the two censuses entirely comparable. Consequently, considerable care must be exercised in the interpretation of changes between 1981 and 1986.

The 1986 classification of languages differs from that used in 1981, especially with regard to the aboriginal languages. Appendix B of the 1986 Census Dictionary (Catalogue No. 99-101E) provides a description of the changes.

Official language. Some respondents report speaking English or French or both at home, while on the other hand they indicate in the official language question, that they cannot carry on a conversation in these languages.

In such cases, in the 1981 Census, the answer to the official language question was considered erroneous. Consequently, during data processing. this answer was changed to show that the person could speak the official language(s) they had reported to the home language question.

In the 1986 Census, not all of these responses were considered erroneous. If the respondent indicated being able to speak only one official language either English or French - and this language matched the person's mother tongue, no correction was made during processing. Consequently, these response patterns appear as such in the 1986 tabulations.

Aboriginal languages. Users should be aware that the data for some Indian reserves and Indian settlements are not available (see special note "Incompletely Enumerated Indian Reserves and Indian Settlements"). Among the population who participated in the 1986 Census, 138,000 persons reported a single aboriginal language as mother tongue and 97,000 persons reported a single aboriginal language as home language.

Respondents who reported "Indian" as a language were classified in the "Amerindian languages, not included elsewhere (n.i.e.)" category. category consists of 8,000 persons for mother tongue and 5,500 persons for home language. It is included in the total for aboriginal languages. Users should note that for mother tongue data, approximately a quarter of the 8,000 responses classified in this category, at the Canada level, were provided by respondents of Asian origin. This proportion is roughly the same in the Atlantic provinces and British Columbia. It is under 5% in Manitoba, Saskatchewan and the Territories. In Quebec and Alberta, the proportion is higher than the national figure, about 40% and 45% respectively. In Ontario, approximately 2 out of every 3 respondents in this category were of Asian origin. For home language data, the proportion of Asians is higher, about one-half of the 5,500 respondents at the Canada level. The proportion is also about one-half in Quebec. Approximately 2 out of 3 respondents were of Asian origin in British Columbia and 4 out of 5 in Alberta and Ontario. Again, as was the case for mother tongue, the proportion was below 5% in Manitoba. In the remaining provinces and territories, very few persons reported "Indian" as their home language.

For further information on language data, contact the Housing, Family and Social Statistics Division, Statistics Canada, Ottawa, Canada K1A 0T6.

# COMPARABILITY OF DATA ON ETHNIC ORIGIN

Comparison between 1981 and 1986. The 1981 and 1986 ethnic origin data are not directly comparable.

The 1981 ethnic origin question: To which ethnic or cultural group did you or your ancestors belong on first coming to this continent?, was modified for the 1986 Census. The phrase "on first coming to this continent" was removed from the 1986 version as it was viewed as being inappropriate for persons of aboriginal origin. The 1986 question was: To which ethnic or cultural group(s) do you or did your ancestors belong?

In 1986, respondents were instructed to mark or specify as many groups as apply. This instruction along with the addition of two more write-in spaces contributed significantly to an increase in multiple ethnic origin responses.

As well, the mark boxes in the question were ordered on the basis of 1981 incidence reporting of single ethnic origins. This changed the relative position of the mark boxes Chinese and Polish.

In light of the recommendations of a Parliamentary Commission on Visible Minorities in Canadian Society in the report <u>Equality Now</u> and the Abella Commission on Equality in Employment, the mark box Black was added to the 1986 ethnic origin question.

The mark boxes for aboriginal peoples were also changed. In 1986, status and non-status Indian categories which had been part of the 1981 ethnic origin question were replaced by North American Indian. It should be noted that persons of nonaboriginal cultural origin but status Indian under the Indian Act of Canada, for example, persons who obtained Indian status at marriage, could have been included in 1981 data for aboriginal peoples. These persons may not have identified their ethnic origin to be North American Indian in 1986 and thus would not be included in the 1986 count of aboriginal peoples. Also, in 1986, an undetermined number of persons of Métis origin could have indicated their ethnic origin as being the multiple response North American Indian and some other ethnic or cultural origin(s).

#### Single, Multiple and Total Response

A **Single Response** occurs when the respondent provides only one origin. For example, for Canada, 709,585 gave Italian as their only ethnic origin.

A Multiple Response occurs when the respondent provides more than one origin. Some 297,325 Canadians gave a response which included Italian and one or more ethnic or cultural origin(s). For example, 31,495 provided the multiple response combination: Italian and French.

A Total Response is the sum of single and multiple responses for each ethnic origin. For example, the total response count for the Italian ethnic group is 1,006,910, for Canada.

In Tables 1 and 2, single, multiple and total responses for each ethnic group or category are shown. For example, the single Italian count is 709,585, the multiple Italian count is 297,325 and the total Italian count is 1,006,910. The particular combination of origins, Italian and French, would be shown in Table 1 and Table 2. For Canada, it would appear as part of the Italian multiple (297,325) in Table 2 and as part of the French multiple (2,030,195) in Table 1.

Users should note that the sum of total responses for all ethnic groups will be greater than the total population for the geography shown, as respondents have reported more than one ethnic origin.

For further information regarding the data on ethnic origin, please contact the Housing, Family and Social Statistics Division, Statistics Canada, Ottawa, Ontario K1A 0T6.

# IMMIGRANT POPULATION AND POPULATION BORN OUTSIDE CANADA

All persons born outside Canada are not necessarily immigrants to Canada. Individuals who have reported their place of birth outside Canada, but who are Canadian citizens by birth, are not considered immigrants to Canada. Consequently, they do not have a period of immigration or age at immigration when they take up permanent residence in Canada. These individuals will be included in the non-immigrant population. This approach was used in the 1981 Census. By contrast, in the 1971 Census, all persons born outside Canada were categorized as immigrants and required to respond to the question on period of immigration.

#### **INCOME DATA**

Average income, median income and standard error of average income of population 15 years and over are calculated for persons with income only, but for all census families and private households whether or not they reported any income. Aggregate income calculated from these data should be used with caution as averages were calculated prior to rounding. Medians have been calculated from unpublished grouped data.

The total income concept in the 1986 Census included, for the first time, federal child tax credits. As in 1981, the 1986 Census did not collect income information from institutional residents. Income statistics for families and households are published for those in private households only.

Total and employment income size distributions by various characteristics for the population 15 years and over in Canada, provinces and territories are published in separate reports. Also published separately are the income size distributions of census families, non-family persons, economic families, unattached individuals and private households.

Census income statistics are subject to sampling variability. Although such sampling variability may be quite small for large population groups, its effects cannot be ignored in the case of very small subgroups of population in an area or in a particular category. This is because, all other things being equal, the larger the sample size, the smaller is the error. For this reason, income data for areas, where the non-institutional population was below 250, have been suppressed. However, where statistics are not suppressed but are still based on relatively small totals, the readers are strongly advised to exercise caution in the use and interpretation of these statistics.

### LABOUR FORCE ACTIVITY

The census labour force activity concepts have not changed between 1981 and 1986. However, the processing of the data was modified causing some differences. In the 1986 Census, contrary to previous censuses, a question on school attendance was not asked. This question was used to edit the labour force activity variable, specifically unemployment. Consequently, the processing differences affect the unemployed population and are mostly concentrated among the 15-19-year age group. The table on the following page indicates the magnitude of the effect upon the data, at the Canada level.

# NUMBER OF WEEKS WORKED

The data for the 40-48 and 49-52 weeks worked categories for 1985 must be interpreted with caution because some respondents tend to exclude their paid leave of absence due to vacation or for other reasons from their work weeks, when in fact such leave of absence should be included. As a result, the 49-52 week category may be understated.

# Labour Force Activity, 1981 Census of Canada

Canada	1981 Census (as published in 1981)	1981 Census (using 1986 processing)	% change
Labour force 15 years and over	12,054,150	12,081,280	0.23
Employed	11,167,915	11,167,915	no change
Unemployed	886,235	913,365	3.06
Not in the labour force	6,555,135	6,528,005	-0.41
Labour force 15-19 years	1,073,945	1,098,390	2.28
Employed	906,705	906,705	no change
Unemployed	167,240	191,680	14.61
Not in the labour force	1,229,630	1,205,190	-1.99
Labour force 20 years and over	10,980,205	10,982,890	0.02
Employed	10,261,210	10,261,210	no change
Unemployed	718,995	721,685	0.37
Not in the labour force	5,325,505	5,322,815	-0.05

APPENDIX 1: Population and Occupied Private Dwellings, Showing Estimates for Incompletely Enumerated Indian Reserves and Indian Settlements, for Canada, Provinces and Territories, 1986

APPENDIX 2: Composition of Major Ethnic Categories, for Canada, 1986 Census

SING	LE ORIGINS	MULTIPLE ORIGINS
East/South East Asian origins - Concluded		
Thai Vietnamese Other Asian, n.i.e.	1,230 53,015 2,145	1,700 9,980 935
Pacific Islands origins	6,620	3,725*
Fijian Polynesian Other Pacific Islanders	6,035 230 360	2,000 500 1,335
Latin, Central and South American origins	32,240	17,795*
Argentinian Brazilian Chilean Ecuadorian Mexican Peruvian Other Latin/Central/South American origins	1,275 1,365 8,075 1,240 3,000 2,620 14,660	1,295 1,670 2,305 320 5,130 1,600 6,025
Caribbean origins	48,475	32,685*
Cuban Haitian Jamaican Puerto Rican Other Caribbean, n.i.e. Other West Indian	410 10,865 11,210 375 950 24,670	775 6,140 8,510 720 1,380 15,620
Black origins	174,970	85,360*
Black African Black	170,340 4,630	83,775 4,120
Aboriginal peoples	373,260	338,460*
Inuit Métis North American Indian	27,290 59,745 286,230	9,175 91,865 262,730

Note: Provincial counts for the above groups can be obtained from Catalogue No. 93-109, Table 2.

Abbreviation: n.i.e. = not included elsewhere

<sup>\*</sup> The multiple response count for each major ethnic category does not equal the sum of the component ethnic groups. For example, a respondent giving the ethnic origin combination of English and Irish will be counted once in the multiple response for the major ethnic category "British origins" (6,038,760), but will be counted in both the English multiple (4,561,910) and in the Irish multiple (2,922,605).

# ACCESSIBLE FROM COAST TO COAST

Statistics Canada's regional reference centres provide a full range of the census products and services. Each reference centre is equipped with a library and a sales counter where users can consult or purchase census publications, microcomputer diskettes, microfiche, maps and more. Each centre has facilities to retrieve information from Statistics Canada's computerized data retrieval systems – CANSIM and TELICHART. A telephone inquiry service is also available with toll-free numbers for regional clients outside local calling areas. Many other services - from seminars to consultations - are offered. Call or write your regional reference centre for information. For a brief description of the products and services available from the 1986 Census, consult the section on Guidelines for Using This Publication.

# DOCUMENTS DE RÉFÉRENCE EN FRANÇAIS

# DÉFINITIONS

Seul un résumé des définitions des termes géographiques et des concepts du recensement est présenté ici. Les utilisateurs doivent consulter le **Dictionnaire du recensement de 1986** (nº 99-101F ou E au catalogue) pour les définitions complètes et les observations additionnelles pertinentes.

#### **ACTIVITÉ**

Activité sur le marché du travail des personnes en âge de travailler qui, au cours de la semaine précédant le 3 juin 1986, faisaient partie de la population active occupée ou de la population active en chômage. Les autres personnes, en âge de travailler, qui n'étaient ni occupées ni en chômage sont classées dans la catégorie des inactifs. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

### ÂGE

Âge au dernier anniversaire de naissance (à la date de référence du recensement, le 3 juin 1986). Cette variable est établie d'après la réponse à la question sur la date de naissance qui demande le jour, le mois et l'année de naissance. Les personnes qui ne connaissaient pas la date exacte de leur naissance devaient donner la meilleure estimation possible.

#### ÂGE À L'IMMIGRATION

Âge du recensé lorsqu'il a immigré au Canada pour la première fois.

Il convient de souligner que la question posée aux recensements de 1981 et 1986 vise une population plus restreinte (les personnes qui ne sont pas citoyens canadiens de naissance) que ce n'était le cas en 1971 (toutes les personnes nées à l'extérieur du Canada). À cause des méthodes de traitement utilisées, les réponses possibles aux recensements précédents ont été groupées d'avance par périodes d'immigration de sorte qu'il est impossible d'établir l'âge particulier au moment de l'immigration et l'année de celle-ci.

#### ANNÉE D'IMMIGRATION

Année au cours de laquelle une personne qui n'est pas citoyen canadien de naissance a immigré au Canada pour la première fois.

Il convient de souligner que la question posée aux recensements de 1981 et 1986 vise une population plus restreinte (les personnes qui ne sont pas citoyens canadiens de naissance) que ce n'était le cas en 1971 (toutes les personnes nées à l'extérieur du Canada). À cause des méthodes de traitement utilisées, les réponses possibles aux recensements précédents ont été groupées d'avance par périodes d'immigration de sorte qu'il est impossible d'établir l'âge particulier au moment de l'immigration et l'année de celle-ci.

# CHÔMEURS(EUSES)

Personnes qui, pendant la semaine précédant le recensement:

- a) étaient sans travail, mais avaient cherché un emploi au cours des quatre semaines précédentes et étaient prêtes à travailler; ou
- b) avaient été mises à pied mais prévoyaient reprendre leur emploi; ou
- avaient pris des dispositions précises en vue de se présenter à un nouvel emploi dans les quatre semaines suivantes.

Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

#### CITOYENNETÉ

Statut légal de citoyenneté du recensé. Les personnes qui ont plus d'une citoyenneté devaient en faire état dans leur réponse.

En 1971, les recensés devaient indiquer leur pays de citoyenneté qui était ensuite codé. En 1981 et en 1986, cette opération de codage a été supprimée. Pour obtenir des renseignements sur des pays de citoyenneté particuliers, il suffit de procéder au classement recoupé du lieu de naissance et de la citoyenneté.

#### ERREUR TYPE DU REVENU MOYEN

Estimation de l'erreur type du revenu moyen. Il s'agit d'une estimation de l'erreur introduite dans les données du fait qu'elles sont recueillies seulement auprès d'un ménage sur cinq dans un échantillon aléatoire. Lorsqu'il se sert de ces chiffres, l'utilisateur peut être raisonnablement certain que, pour un groupe de personnes de 15 ans et plus (par ex., hommes de 45 à 54 ans), la valeur réelle (la valeur que l'on aurait obtenue sans l'échantillonnage) équivaut à plus ou moins deux fois l'erreur type, et presque certain que cette valeur équivaut à plus ou moins trois fois l'erreur type. Ces estimations ne tiennent pas compte des effets de certains types d'erreurs de réponse, d'erreurs systématiques ou d'erreurs de couverture.

### ERREUR TYPE DU REVENU MOYEN D'EMPLOI

Estimation de l'erreur type du revenu moyen d'emploi. Il s'agit d'une estimation de l'erreur introduite dans les données du fait qu'elles sont recueillies seulement auprès d'un ménage sur cinq dans un échantillon aléatoire. Lorsqu'il se sert de ces chiffres, l'utilisateur peut être raisonnablement certain que, pour un groupe de personnes de 15 ans et plus (par ex., hommes de 45 à 54 ans), la valeur réelle (la valeur que l'on aurait obtenue sans l'échantillonnage) équivaut à plus ou moins deux fois l'erreur type, et presque certain que cette valeur équivaut à plus ou moins trois fois l'erreur type. Ces estimations ne tiennent pas compte des effets de certains types d'erreurs de réponse, d'erreurs systématiques ou d'erreurs de couverture.

#### ÉTABLISSEMENT INDIEN

Lieu, désigné par le ministère des Affaires indiennes et du Nord Canada (AINC) à des fins statistiques seulement, où un groupe indépendant d'au moins 10 autochtones habitent de façon plus ou moins permanente. Les établissements indiens sont généralement situés sur des terres de la Couronne soumises à l'autorité fédérale ou à celle des administrations provinciales. Contrairement aux réserves indiennes, ces terres ne sont pas réservées à l'usage exclusif d'une bande indienne.

#### **ÉTAT MATRIMONIAL**

Situation conjugale d'une personne.

#### Actuellement marié(e) (sauf séparé(e))

Personne dont le conjoint est vivant, à moins que le couple ne soit séparé ou divorcé; les personnes vivant en union libre sont considérées comme actuellement mariées.

#### Séparé(e)

Personne qui a été abandonnée, ou qui est séparée de son conjoint, légalement ou non, parce qu'elle ne veut plus vivre avec cette personne, mais qui n'a pas obtenu de divorce.

#### Divorcé(e)

Personne qui a obtenu un divorce et qui ne s'est pas remariée.

### Veuf(ve)

Personne dont le conjoint est décédé et qui ne s'est pas remariée.

# Célibataire (jamais marié(e))

Personne qui n'a jamais été mariée (y compris toute personne de moins de 15 ans), ou personne dont le mariage a été annulé.

#### **INACTIFS**

Personnes qui, pendant la semaine précédant le recensement, ne voulaient pas ou ne pouvaient pas travailler compte tenu des conditions existant sur le marché du travail. Sont incluses les personnes qui avaient cherché du travail au cours des quatre semaines précédentes mais qui n'étaient pas prêtes à travailler pendant la semaine de référence, de même que les personnes qui n'avaient pas travaillé, n'avaient pas d'emploi auquel elles devaient se présenter au cours des quatre semaines suivant la semaine de référence et n'avaient pas été temporairement mises à pied ni n'avaient cherché de travail pendant cette période. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

# INDUSTRIE (SELON LA CLASSIFICATION DE 1980)

Nature générale de l'activité de l'établissement où travaille le recensé, déterminée par le nom de l'employeur et par le genre d'entreprise, d'industrie ou de service. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le recensement, il devait donner des renseignements sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 1985. Les personnes qui avaient deux emplois ou plus devaient fournir des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures de travail.

Les données sur l'industrie sont groupées selon la Classification type des industries de 1980; il s'agit d'une classification à trois niveaux d'agrégation: 18 divisions (identifiées A à R) qui se subdivisent en 75 grands groupes et, par la suite, en 296 groupes.

Il est possible de procéder à des comparaisons directes des données sur l'industrie tirées des recensements de 1971, 1981 et 1986, en se fondant sur la CAÉ de 1970. Pour plus de détails à ce sujet, voir la définition d'INDUSTRIE (selon la classification de 1970) dans le Dictionnaire du recensement de 1986, nº 99-101F au catalogue.

#### LANGUE MATERNELLE

Première langue apprise dans l'enfance et encore comprise par le recensé au moment du recensement.

En 1986, les instructions ci-après étaient fournies aux recensés:

"Vous devez indiquer la première langue que vous avez apprise dans votre petite enfance, c'est-à-dire avant d'aller à l'école. Si vous ne la comprenez plus, indiquez la seconde langue que vous avez apprise. Si vous répondez pour une autre personne, indiquez la première langue qu'elle a apprise dans sa petite enfance.

Si vous comprenez plusieurs langues, indiquez celle que vous avez apprise en premier lieu. Si vous en avez appris deux simultanément, indiquez celle que vous parliez vous-même le plus souvent à la maison. Si vous les utilisiez également, indiquez-les toutes les deux.

Dans le cas d'un enfant qui n'a pas encore appris à parler, indiquez la langue qu'il apprendra en premier lieu à la maison. S'il apprend simultanément deux langues, indiquez celle dans laquelle on lui parle le plus souvent. Si les deux sont utilisées également, indiquez-les toutes les deux.

Les personnes de langue indienne (de l'Inde) ne doivent pas indiquer indien mais plutôt hindi, ourdou, pendjabi ou une autre langue, selon le cas. Les personnes de langue amérindienne (indien(ne) de l'Amérique du Nord) doivent indiquer le cri, l'ojibway ou une autre langue amérindienne, selon le cas."

#### LANGUE OFFICIELLE

Indique si le recensé peut soutenir une conversation en anglais ou en français, les langues officielles du Canada.

Il convient de souligner que les données provenant de la question sur les langues officielles portent sur l'auto-évaluation par les recensés de leur capacité de parler les deux langues officielles.

En 1986, les instructions ci-après étaient fournies aux recensés:

"N'indiquez pas l'anglais ou le français appris à l'école à moins de pouvoir soutenir une conversation assez longue sur divers sujets dans cette langue.

Dans le cas d'un enfant qui n'a pas encore appris à parler, indiquez la langue parlée le plus souvent à la maison s'il s'agit de l'anglais ou du français. Si l'une est aussi fréquemment utilisée que l'autre, indiquez "L'anglais et le français". Cochez la case "Ni l'anglais ni le français" quand ni l'une ni l'autre n'est fréquemment utilisée.

Si vous êtes muet(te), indiquez l'anglais, le français ou les deux dans la mesure où vous pouvez vous faire comprendre dans cette (ces) langue(s)."

# LANGUE PARLÉE À LA MAISON

Langue que le recensé parlait à la maison au moment du recensement. Si le recensé parlait plus d'une langue, il devait indiquer la langue qu'il utilisait le plus fréquemment.

En 1986, les instructions ci-après étaient fournies aux recensés:

"Vous devez indiquer la langue que vous parlez vous-même le plus souvent à la maison. Si vous répondez pour une autre personne, indiquez la langue qu'elle parle le plus souvent.

Si vous parlez deux langues également, indiquez-les toutes les deux.

Dans le cas d'un enfant qui ne parle pas encore, indiquez la langue le plus souvent parlée à la maison. Si deux langues sont également utilisées, indiquez-les toutes les deux.

Si vous êtes muet(te), indiquez la langue dont vous vous servez le plus souvent à la maison pour vous faire comprendre.

Si vous demeurez seul(e), indiquez la langue dans laquelle vous êtes le plus à l'aise. Les personnes d'origine indienne (de l'Inde) ne doivent pas indiquer indien mais plutôt hindi, ourdou, pendjabi ou une autre langue, selon le cas. Les personnes d'origine amérindienne (indien(ne) de l'Amérique du Nord) doivent indiquer le cri, l'ojibway ou une autre langue amérindienne, selon le cas."

#### LIEU DE NAISSANCE

Province de naissance, pour les personnes nées au Canada, ou pays de naissance, pour les personnes nées à l'extérieur du Canada. Les recensés devaient déclarer leur lieu de naissance d'après les frontières au jour du recensement.

# **ORIGINE ETHNIQUE**

Groupe(s) ethnique(s) ou culturel(s) auquel (auxquels) appartenait(aient) le recensé ou ses ancêtres. Le groupe ethnique ou culturel se rapporte à l'origine des ancêtres, aux "racines" de la population et ne doit pas être confondu avec la citoyenneté ou la nationalité.

Il convient de souligner qu'antérieurement au recensement de 1981, les recensés devaient déclarer uniquement les antécédents ethniques ou culturels du côté paternel. Même si plusieurs origines ethniques avaient été déclarées, une seule était saisie; autrement dit, une seule origine ethnique était retenue pour chaque recensé. En 1981, cette restriction a été supprimée de façon à tenir compte des origines multiples. Dans le questionnaire de 1981, un espace était prévu pour une réponse en toutes lettres, en plus des cases de réponse. Dans le questionnaire de 1986, les recensés peuvent déclarer jusqu'à trois origines ethniques en plus de celles qui sont proposées dans les cases de réponse. Cela augmente le nombre de réponses multiples possibles.

Dans le questionnaire de 1986, la question est légèrement différente de celle de 1981. En 1981, on demandait aux recensés: "À quel groupe ethnique ou culturel apparteniez-vous, vous ou vos ancêtres, à votre première arrivée sur ce continent?" La précision "à votre première arrivée sur ce continent" a été supprimée dans le questionnaire de 1986. En 1986, la question a été reformulée comme suit: "À quel(s) groupe(s) ethnique(s) ou culturel(s) appartenez-vous ou vos ancêtres appartenaient-ils?"

#### PENSIONNAIRE D'INSTITUTION

Résident d'un logement collectif d'institution, autre qu'un membre du personnel et sa famille.

Les logements collectifs d'institution comprennent les orphelinats et foyers pour enfants, les centres de soins spéciaux et établissements pour personnes âgées et malades chroniques, les hôpitaux, les hôpitaux psychiatriques, les centres de traitement et établissements pour handicapés physiques, les établissements pénitentiaires et établissements de correction, les foyers pour jeunes contrevenants et les prisons.

### PÉRIODE D'IMMIGRATION

Tranches d'années établies d'après l'année d'immigration déclarée par les personnes qui ne sont pas citoyens canadiens de naissance.

Il convient de souligner que la question posée aux recensements de 1981 et 1986 vise une population plus restreinte (les personnes qui ne sont pas citoyens canadiens de naissance) que ce n'était le cas en 1971 (toutes les personnes nées à l'extérieur du Canada). À cause des méthodes de traitement utilisées, les réponses possibles aux recensements précédents ont été groupées d'avance par périodes d'immigration de sorte qu'il est impossible d'établir l'âge particulier au moment de l'immigration et l'année de celle-ci.

### PERSONNES OCCUPÉES

Personnes qui, au cours de la semaine précédant le 3 juin 1986 :

- a) avaient fait un travail quelconque, à l'exclusion des travaux ménagers, des travaux d'entretien ou des réparations effectués à la maison de même que le bénévolat; ou
- b) étaient temporairement absentes de leur travail ou de l'entreprise à cause d'un conflit de travail à leur lieu de travail, d'une maladie ou d'une incapacité temporaire, de vacances, ou encore pour d'autres raisons.

Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

### POPULATION ACTIVE EXPÉRIMENTÉE

Variable obtenue en retranchant de la population active totale les chômeurs de 15 ans et plus qui n'ont jamais travaillé ou qui ont travaillé seulement avant le 1er janvier 1985.

# POPULATION ACTIVE TOTALE (PENDANT LA SEMAINE DE RÉFÉRENCE)

Personnes qui étaient soit occupées, soit en chômage pendant la semaine précédant le recensement (le 3 juin 1986). Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

# PROFESSION (SELON LA CLASSIFICATION DE 1980)

Genre de travail que faisaient les personnes pendant la semaine de référence. Le genre de travail exécuté est défini à partir du type d'emploi déclaré par le recensé et de la description des tâches les plus importantes qui s'y rattachent. Ces données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution. Si le recensé n'avait pas d'emploi au cours de la semaine précédant le recensement, les données portent sur l'emploi qu'il/elle a occupé le plus longtemps depuis le 1er janvier 1985. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail.

Les données sur la profession sont groupées selon une classification à trois niveaux d'agrégation: 22 grands groupes qui se subdivisent en 80 sousgroupes et, par la suite, en 514 groupes de base.

Les données de 1981 et de 1986 sur la profession sont directement comparables. Dans le cas des données du recensement de 1971, des ajustements préalables doivent être faits à l'univers et à la classification adoptés. Pour plus de renseignements à ce sujet, veuillez vous reporter à la définition de PROFESSION (selon la classification de 1971). Voir le Dictionnaire du recensement de 1986, nº 99-101F au catalogue.

#### PROVINCE

Principale division politique du Canada. Du point de vue statistique, c'est une unité de base pour laquelle toutes les données sont totalisées et recoupées. Dans les publications du recensement, les tableaux relatifs aux provinces comprennent le Yukon et les Territoires du Nord-Quest.

# RÉGION MÉTROPOLITAINE DE RECENSEMENT (RMR)

Le concept général de région métropolitaine de recensement (RMR) s'applique à un noyau urbanisé très important ainsi qu'aux régions urbaines et rurales hautement intégrées à ce noyau sur le plan économique et social.

Le terme RMR désigne la principale zone du marché du travail d'une région urbaine (noyau urbanisé) comptant 100,000 habitants ou plus, d'après les chiffres de population du recensement précédent. Lorsqu'une région devient une RMR, elle continue de faire partie du programme même si, ultérieurement, elle subit une baisse de population.

Quant aux zones des marchés du travail moins vastes des noyaux urbanisés comptant 10,000 habitants ou plus, elles font partie du programme des agglomérations de recensement (AR).

Chaque RMR est constituée d'une subdivision de recensement (SDR) ou plus répondant à au moins un des critères suivants:

- (1) la SDR se trouve entièrement ou en partie dans le noyau urbanisé;
- (2) au moins 50% de la population active occupée demeurant dans la SDR <u>travaille</u> dans le noyau urbanisé:
- (3) au moins 25% de la population active occupée <u>travaillant</u> dans la SDR <u>demeure</u> dans le noyau urbanisé.

#### RÉSERVE INDIENNE

Territoire dont le titre légal de propriété appartient à Sa Majesté la Reine, qui a été réservé à l'usage et au profit d'une bande indienne et qui est assujetti aux termes de la Loi sur les Indiens. Puisque les réserves indiennes échappent généralement à la compétence des autorités locales et sont administrées par le ministère des Affaires indiennes et du Nord Canada (AINC), elles sont considérées par Statistique Canada comme des subdivisions de recensement (SDR).

93-154 93-154

#### REVENU D'EMPLOI

Revenu total reçu en 1985 par les personnes de 15 ans et plus sous forme de rémunération, de revenu net provenant d'un travail autonome non agricole et (ou) de revenu net agricole.

#### a) Salaires et traitements

Salaires et traitements bruts avant les retenues pour l'impôt sur le revenu, les pensions, l'assurance-chômage, etc. Sont compris la solde et les indemnités militaires, les pourboires, les commissions, les gratifications et aussi les gains provenant de tout genre d'emploi occasionnel réalisés durant l'année civile 1985. Est exclue la valeur des allocations et avantages imposables fournis gratuitement par l'employeur tels que le logement ou l'utilisation d'un véhicule automobile, etc.

# b) Revenu net provenant d'un travail autonome non agricole

Revenu net (recettes brutes moins les dépenses d'exploitation, telles que les salaires, les loyers, l'amortissement, etc.), provenant de l'exploitation d'une entreprise non agricole non constituée en société ou de l'exercice d'une profession pour son propre compte, durant l'année civile 1985. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus le revenu net des personnes qui gardent des enfants à leur propre domicile, celui des exploitants d'entreprises de distribution directe, par exemple, pour la vente et la livraison de produits de beauté ainsi que celui des activités autonomes des artistes, des écrivains, des professeurs de musique, des coiffeurs (coiffeuses), des couturiers (ères).

# c) Revenu net provenant d'un travail autonome agricole

Revenu net (recettes brutes provenant de la vente de produits agricoles, moins l'amortissement et les frais d'exploitation) tiré de l'exploitation d'une ferme, pour son propre compte ou en association, durant l'année civile 1985. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus dans le revenu net les subventions, les paiements supplémentaires ou les avances aux agriculteurs accordés par les administrations fédérale et provinciales. Par contre, la valeur du revenu en nature, comme les produits agricoles produits et consommés à la ferme, n'est pas incluse.

### REVENU MÉDIAN DES PARTICULIERS

Valeur centrale séparant la répartition d'un groupe particulier, selon la taille du revenu, en deux parties égales, la première regroupant les unités ayant un revenu inférieur à la médiane, la seconde, les unités ayant un revenu supérieur à la médiane.

#### REVENU MOYEN D'EMPLOI

Revenu total moyen de l'emploi pondéré des personnes de 15 ans et plus qui ont déclaré un revenu d'emploi en 1985. Pour établir le revenu moyen d'emploi à partir de données non arrondies, on divise le revenu agrégé d'emploi d'un groupe de personnes (par ex., hommes de 45 à 54 ans) par le nombre de personnes dans ce groupe qui touchent un revenu d'emploi.

#### REVENU MOYEN DES PARTICULIERS

Revenu total moyen pondéré des personnes âgées de 15 ans et plus qui ont déclaré un revenu en 1985. Pour établir le revenu moyen à partir de données non arrondies, on divise le revenu agrégé du groupe correspondant (par exemple, les hommes de 45 à 54 ans) par le nombre de personnes qui ont déclaré un revenu dans ce groupe.

#### REVENU TOTAL (voir "Sources de revenu")

# SCOLARITÉ: PLUS HAUT NIVEAU ATTEINT

Dernière année d'études terminée ou non au niveau primaire et secondaire, ou dernière année universitaire ou non universitaire terminée. Dans la hiérarchie de la scolarité, les études universitaires sont classées au-dessus de la catégorie "autres études non universitaires". En outre, la personne qui a obtenu un grade, certificat ou diplôme se trouve classée à un échelon audessus de celle qui a un nombre d'années de scolarité plus élevé, terminées ou non, mais qui n'a pas de titre scolaire.

# SCOLARITÉ: PRINCIPAL DOMAINE D'ÉTUDES (PDÉ)

Principale discipline ou principal domaine dans lequel le recensé a fait ses études ou reçu sa formation et obtenu son plus haut grade, certificat ou diplôme postsecondaire. En ce qui a trait au principal domaine d'études, la classification adoptée comporte 10 grandes catégories: enseignement, loisirs et orientation; beaux-arts et arts appliqués; lettres, sciences humaines et disciplines connexes; sciences sociales et disciplines connexes; commerce, gestion et administration des affaires; sciences et techniques agricoles et biologiques; génie et sciences appliquées; techniques et métiers du génie et des sciences appliquées; professions, sciences et technologies de la santé; mathématiques et sciences physiques. Les catégories sont elles-mêmes subdivisées en plus de 100 "sous-catégories", elles-mêmes divisées en plus de 425 groupes de "base".

# SEMAINES TRAVAILLÉES, À PLEIN TEMPS OU À TEMPS PARTIEL, EN 1985

Cette variable s'applique aux personnes qui ont travaillé en 1985. Ces dernières devaient préciser si elles avaient travaillé des semaines complètes ou non. Les personnes qui avaient un emploi à temps partiel pendant une partie de l'année et un emploi à plein temps pendant l'autre partie devaient répondre en fonction de l'emploi pour lequel elles avaient travaillé le plus grand nombre de semaines. Les données sont disponibles pour les personnes de 15 ans et plus qui ont travaillé en 1985, à l'exclusion des pensionnaires d'institution.

#### SEMAINES TRAVAILLÉES EN 1985

Nombre de semaines au cours desquelles les personnes ont travaillé, ne fût-ce que quelques heures, en 1985. Sont comprises les semaines de vacances payées, de congé de maladie ou d'absences payées pour des cours de formation. Les travaux ménagers ou autres travaux d'entretien et les réparations effectués à la maison de même que le bénévolat ne sont pas considérés comme du "travail". Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

#### SEXE

Qualité d'homme ou de femme.

#### SOURCES DE REVENU

Toutes les personnes de 15 ans et plus devaient déclarer leur revenu total provenant des sources suivantes durant l'année civile 1985.

#### a) Salaires et traitements

Salaires et traitements bruts avant les retenues pour l'impôt sur le revenu, les pensions, l'assurance-chômage, etc. Sont compris la solde et les indemnités militaires, les pourboires, les commissions, les gratifications et aussi les gains provenant de tout genre d'emploi occasionnel réalisés durant l'année civile 1985. Est exclue la valeur des allocations et avantages imposables fournis gratuitement par l'employeur tels que le logement ou l'utilisation d'un véhicule automobile, etc.

# b) Revenu net provenant d'un travail autonome non agricole

Revenu net (recettes brutes moins les dépenses d'exploitation, telles que les salaires, les loyers, l'amortissement, etc.), provenant de l'exploitation d'une entreprise non agricole non constituée en société ou de l'exercice d'une profession pour son propre compte, durant l'année civile 1985. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus le revenu net des personnes qui gardent des enfants à leur propre domicile, celui des exploitants d'entreprises de distribution directe, par exemple, pour la vente et la livraison de produits de beauté ainsi que celui des activités autonomes des artistes, des écrivains, des professeurs de musique, des coiffeurs (coiffeuses), des couturiers (ères).

# c) Revenu net provenant d'un travail autonome agricole

Revenu net (recettes brutes provenant de la vente de produits agricoles, moins l'amortissement et les frais d'exploitation) tiré de l'exploitation d'une ferme, pour son propre compte ou en association, durant l'année civile 1985. Dans le cas d'une association, le recensé devait déclarer seulement sa propre part du revenu. Sont inclus dans le revenu net les subventions, les paiements supplémentaires ou les avances aux agriculteurs accordés par les administrations fédérale et provinciales. Par contre, la valeur du revenu en nature, comme les produits agricoles produits et consommés à la ferme, n'est pas incluse.

# d) Pension de sécurité de la vieillesse et supplément de revenu garanti

Pensions de sécurité de la vieillesse et supplément de revenu garanti versés, par l'administration fédérale seulement, aux personnes de 65 ans et plus et aux conjoints de 60 à 64 ans des bénéficiaires de prestations de sécurité de la vieillesse, durant l'année civile 1985. Sont incluses les allocations au conjoint versées au conjoint survivant des bénéficiaires de la pension de sécurité de la vieillesse.

# e) Prestations du Régime de pensions du Canada et du Régime de rentes du Québec

Prestations reçues au cours de l'année civile 1985 en vertu du Régime de pensions du Canada ou du Régime de rentes du Québec, par exemple, les pensions de retraite, les prestations de survivant(e), les pensions d'invalidité. Sont exclues les pensions de retraite des fonctionnaires, des membres de la GRC et des militaires ainsi que les prestations de décès sous forme forfaitaire.

#### f) Allocations familiales

Sont comprises les allocations fédérales et provinciales versées au cours de l'année civile 1985 pour les enfants de moins de 18 ans. Bien que le montant de ces allocations n'ait pas été recueilli directement des recensés, il a été calculé et appliqué au revenu de l'un des parents.

# g) Crédits d'impôt fédéral pour enfants

Sont compris les crédits d'impôt fédéral pour enfants versés au cours de l'année civile 1985 pour les enfants de moins de 18 ans. Bien que le montant de ces crédits n'ait pas été recueilli directement des recensés, il a été calculé et appliqué au revenu de l'un des parents.

# h) Prestations d'assurance-chômage

Total des prestations d'assurance-chômage reçues au cours de l'année civile 1985, avant les déductions d'impôt. Sont incluses les prestations de maladie, de maternité, de pêcheurs, de travail partagé, de recyclage et de retraite reçues en vertu du programme fédéral d'assurance-chômage.

# i) Autre revenu provenant de sources publiques

Tous les transferts, à l'exclusion de ceux qui sont compris dans une source de revenu séparée (allocations familiales, crédits d'impôt pour enfants, pensions de sécurité de la vieillesse et suppléments de revenu garanti, prestations du Régime de pensions du Canada ou du Régime de rentes du Québec et les prestations d'assurance-chômage), reçus des administrations fédérale, provinciales et

municipales durant l'année civile 1985. Cette source comprend les paiements versés aux personnes nécessiteuses comme les mères ayant des enfants à charge, les personnes inaptes au travail de façon temporaire ou permanente, les personnes âgées, les aveugles et les invalides. Sont également inclus les suppléments de revenu accordés par les gouvernements provinciaux, c'est-à-dire les montants versés aux personnes âgées par l'administration provinciale qui s'ajoutent à la pension de sécurité de la vieillesse et au supplément de revenu garanti ainsi que les subventions versées aux personnes âgées par l'administration provinciale pour compenser les frais de logement. Enfin, sont aussi inclus d'autres paiements de transfert, par exemple, les prestations du Programme national de formation, les pensions aux anciens combattants, les allocations aux anciens combattants, les pensions aux veuves et aux personnes à charge des anciens combattants, les indemnisations des accidents du travail. etc. Sont aussi inclus les crédits d'impôt et autres allocations des gouvernements provinciaux, conformément aux déclarations d'impôt.

### j) Dividendes et intérêts d'obligations, de dépôts et de certificats d'épargne et autre revenu de placements

Intérêts perçus durant l'année civile 1985 au titre de dépôts dans des banques, des sociétés de fiducie, des coopératives, des caisses d'épargne et de crédit, des caisses populaires, etc., ainsi que les intérêts des certificats d'épargne, d'obligations garanties et non garanties et de tous les dividendes de sources canadiennes et étrangères. Comprend également les autres revenus de placements provenant de sources canadiennes ou étrangères tels que les revenus nets provenant d'une propriété, les intérêts sur prêts et hypothèques, le revenu régulier provenant d'une succession ou d'un fonds de fiducie et les intérêts sur polices d'assurance.

#### k) Pensions de retraite et rentes

Tout revenu ordinaire reçu durant l'année civile 1985 à la suite de cotisations à un régime de retraite couvrant un employé ou un groupe d'employés. Sont inclus les paiements reçus de toutes les rentes, y compris les paiements reçus en vertu d'un régime enregistré d'épargneretraite (REÉR) venu à échéance reçus sous forme de rente viagère, de rente à échéance fixe, d'un fonds enregistré de revenu de retraite ou d'un contrat de rente à versements

invariables, les pensions versées aux veuves ou à d'autres parents de pensionnés décédés, les pensions des fonctionnaires et des personnes des Forces armées ou d'officiers de la GRC à la retraite, les rentes du Fonds des rentes du gouvernement canadien, d'une compagnie d'assurance, etc. Sont exclus les prestations de décès sous forme forfaitaire, les prestations et les retraits globaux d'un régime de pension ou d'un REÉR ou les remboursements de cotisations payées en trop.

# l) Autre revenu en espèces

Revenu ordinaire reçu durant l'année civile 1985 qui n'a pas été déclaré dans l'une des neuf autres sources indiquées sur le questionnaire, par exemple, pension alimentaire, soutien d'un enfant, soutien périodique reçu de personnes non membres du ménage, revenu net provenant de chambreurs et de pensionnaires, revenu reçu de l'étranger (sauf les dividendes et intérêts), bourses d'études non remboursables, indemnités de cessation d'emploi, redevances, indemnités de grève.

# Recettes non comptées comme revenu

Ne sont pas compris les gains et pertes de jeu, les sommes forfaitaires héritées au cours de l'année, les gains et pertes de capital, le produit de la vente d'une propriété ou de biens personnels, les remboursements d'impôt sur le revenu, les prêts reçus, les emprunts remboursés à une personne comme le prêteur, les règlements forfaitaires de polices d'assurance, les remises d'impôts fonciers et d'autres taxes, et les remboursements de cotisations des pensions ainsi que tout genre de revenu en nature comme le gîte et le couvert gratuits, ou la nourriture et les produits agricoles récoltés et consommés sur la ferme.

#### Revenu total

Le revenu total est la somme des montants reçus en 1985 par un bénéficiaire à partir des sources de revenu énumérées ci-dessus.

#### TAUX D'ACTIVITÉ

Pourcentage de la population active totale (pendant la semaine de référence) par rapport à la population totale de 15 ans et plus, à l'exclusion des pensionnaires d'institution, dans un secteur, un groupe ou une catégorie.

### TAUX DE CHÔMAGE

Pourcentage de la population active en chômage par rapport à la population active totale (pendant la semaine de référence) dans un secteur, un groupe ou une catégorie. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

### TRAVAIL EN 1985

Indique le nombre de semaines au cours desquelles les personnes ont travaillé, en 1985, à plein temps ou à temps partiel. Les données sont disponibles pour les personnes de 15 ans et plus, à l'exclusion des pensionnaires d'institution.

# ÉCHANTILLONNAGE ET PONDÉRATION

Les données du recensement de 1986 ont été recueillies sur une base de 100% (c'est-à-dire auprès de tous les ménages) ou par un échantillonnage aléatoire des ménages; ces données sont pondérées afin de fournir des estimations sur l'ensemble de la population. Les renseignements figurant dans le présent bulletin ont été recueillis auprès d'un échantillon de 20% et pondérés afin de compenser l'effet de l'échantillonnage. Tous les titres des tableaux ont été annotés en conséquence. (Veuillez remarquer que, dans les réserves indiennes et les régions éloignées, toutes les données ont été recueillies auprès de toute la population. Dans les Territoires du Nord-Quest. les données ont été recueillies auprès de toute la population mais, pour les collectivités de Fort Smith, Hay River, Pine Point et Yellowknife. seulement 20% des données ont été traitées.)

Quelle que soit la région géographique, le total ou total partiel pondéré de la population, des ménages, des logements ou des familles peut différer de celui qui figure dans les bulletins de données intégrales. Cet écart (outre l'effet de l'arrondissement aléatoire) sera attribuable à l'échantillonnage.

# QUALITÉ DES DONNÉES

#### GÉNÉRALITÉS

Le recensement de 1986 a été un projet complexe de grande envergure. Même si l'on a déployé des efforts considérables pour maintenir des normes élevées tout au cours des activités de collecte et de traitement, les estimations obtenues sont inévitablement entachées d'erreurs. Les utilisateurs doivent savoir que ces erreurs existent et avoir une idée générale des principales composantes du recensement afin d'être en mesure de déterminer si les données du recensement peuvent leur être utiles et évaluer les risques que comporte le fait de baser leurs conclusions ou leurs décisions sur ces données.

Des erreurs peuvent se produire pratiquement à toutes les étapes du recensement, allant de la préparation des documents au traitement des données, en passant par l'établissement des listes des logements et la collecte des données. Certaines erreurs peuvent survenir plus ou moins au hasard et, lorsque les différentes réponses sont agrégées pour un groupe suffisamment grand, elles tendent à s'annuler. Dans le cas des erreurs de cette nature, plus le groupe est grand, plus l'estimation correspondante est exacte. C'est pour cette raison que les utilisateurs sont invités à employer avec une certaine réserve les petites estimations. Par contre, d'autres erreurs peuvent se produire systématiquement et entraîner des estimations "biaisées". Comme le biais découlant de ces erreurs est persistant, peu importe la taille du groupe pour lequel les réponses sont agrégées, et qu'il est particulièrement difficile à mesurer, les erreurs systématiques posent un plus grave problème à la plupart des utilisateurs des données que les erreurs aléatoires mentionnées plus haut.

En ce qui concerne les données du recensement en général, les principaux types d'erreur sont les suivants:

- les erreurs d'observation, qui se produisent lorsqu'on oublie des logements ou des personnes, qu'on les englobe à tort ou qu'on les compte deux fois;
- les erreurs dues à la non-réponse, qui découlent du fait qu'on n'a pas pu obtenir de réponses d'un petit nombre de ménages et(ou) de personnes à cause d'une absence prolongée ou pour toute autre raison;
- les erreurs de réponse, qui surviennent lorsque le répondant, et parfois le recenseur, a mal interprété une question du recensement et a inscrit une mauvaise réponse;

- les erreurs de traitement, qui peuvent se produire à diverses étapes, notamment: au codage, lorsque les commis transforment les réponses en toutes lettres en codes numériques; à la saisie des données, lorsque les préposés à l'introduction des données transfèrent sur les bandes pour ordinateur les réponses figurant sur le questionnaire du recensement; à l'imputation, lorsque l'ordinateur insère dans un enregistrement une réponse "valide", mais pas nécessairement exacte, pour remplacer des données manquantes ou "invalides" (une réponse est "valide" si elle est conforme aux autres renseignements de l'enregistrement, elle est "invalide" si elle n'est pas conforme);
- les erreurs d'échantillonnage, qui s'appliquent uniquement aux questions supplémentaires figurant sur la formule complète et s'adressant à un échantillon d'un cinquième des ménages; elles résultent du fait que les réponses à ces questions, lorsqu'elles sont pondérées pour représenter l'ensemble de la population, diffèrent inévitablement des résultats qu'on aurait obtenus si on avait posé ces questions à tous les ménages.

Les types d'erreur ci-dessus ont chacun une composante aléatoire et une composante systématique. Toutefois, la composante systématique des erreurs d'échantillonnage est généralement très faible par rapport à la composante aléatoire. Par contre, dans le cas des erreurs non dues à l'échantillonnage, les deux composantes peuvent être importantes.

#### ERREURS D'OBSERVATION

Les erreurs d'observation peuvent influer sur la précision des chiffres du recensement, c'est-à-dire la taille des divers univers du recensement: la population, les familles, les ménages et les logements. Bien qu'on ait pris quelques mesures pour corriger les erreurs identifiables, une certaine marge d'erreur subsiste toujours dans les chiffres définitifs du fait que des logements ou des personnes ont été oubliés, pris en compte par erreur dans le recensement ou comptés deux fois.

Si des logements ou des personnes n'ont pas été pris en compte alors qu'ils auraient dû l'être, on a un sous-dénombrement. Des logements peuvent être oubliés à la suite d'une mauvaise interprétation des limites des secteurs de dénombrement (SD) ou du fait que des logements sont cachés ou semblent inhabitables. Des personnes peuvent être oubliées quand le logement est oublié ou classé comme inoccupé, ou quand

certains membres des ménages sont omis sur le questionnaire parce que le répondant a mal interprété les instructions concernant les personnes à inclure. Certaines personnes peuvent être oubliées parce qu'elles n'ont aucun lieu habituel de résidence et qu'elles ne se trouvaient dans aucun logement la nuit du recensement.

Les logements ou les personnes qui ont été pris en compte par erreur ou qui ont été comptés deux fois donnent lieu à un surdénombrement. Le surdénombrement des logements peut se produire lorsque des constructions ne convenant pas à l'habitation sont comptées comme des logements ou lorsque des unités qui ne correspondent pas à la définition d'un logement utilisée dans le recensement sont énumérées séparément au lieu d'être considérées comme faisant partie d'un grand logement. Le double compte des logements peut se produire, par exemple dans les cas où les limites des SD ne sont pas clairement définies. Les personnes peuvent être comptées deux fois parce que leur logement est compté deux fois ou parce que les lignes directrices concernant les personnes à inscrire dans le questionnaire ont été mal interprétées. Parfois, une personne qui n'habite pas habituellement le Canada peut être comptée, à tort, dans le recensement. En moyenne, le surdénombrement est moins susceptible de se produire que le sous-dénombrement; les chiffres des logements et des personnes sont donc probablement légèrement sous-estimés.

En 1986, on a entrepris quatre études pour mesurer les différents aspects des erreurs d'observation. Premièrement, on a revisité un échantillon des logements dénombrés comme inoccupés afin de vérifier s'ils étaient vraiment inoccupés le jour du recensement. On a rectifié les chiffres définitifs du recensement pour tenir compte des ménages oubliés parce que leur logement a été classé par erreur comme inoccupé. Deuxièmement, on a prélevé un échantillon des personnes dénombrées comme résidents temporaires pour vérifier si elles ont été dénombrées à leur lieu habituel de résidence. Au moyen de cet échantillon, on a pu estimer le nombre de personnes qui ont été oubliées parce qu'elles étaient temporairement absentes de leur lieu habituel de résidence. On a apporté les corrections correspondantes aux chiffres de population définitifs. Malgré ces corrections, les chiffres définitifs sont encore sujets à un certain sous-dénombrement. Pour l'ensemble du Canada et pour chaque province, on mesure l'ampleur de ce sous-dénombrement résiduel dans le recensement de 1986 au moven d'une étude spéciale: la Contre-vérification des dossiers. Le sous-dénombrement est généralement plus élevé pour certains groupes de la population, tels que les jeunes hommes adultes et les récents immigrants.

Le sous-dénombrement est compensé dans une certaine mesure par les erreurs de surdénombrement; en 1986, pour la première fois une étude spéciale est maintenant en cours, pour déterminer les erreurs de surdénombrement.

### AUTRES ERREURS NON DUES À L'ÉCHANTILLONNAGE

Les erreurs d'observation font varier le nombre d'unités dans les divers univers du recensement, tandis que d'autres genres d'erreur font varier les caractéristiques de ces unités.

Il est parfois impossible d'obtenir d'un ménage une réponse complète, même si le logement a été jugé occupé et' un questionnaire a été livré. Les membres du ménage ont pu s'absenter pendant toute la période du recensement ou, dans de rares cas, le chef de ménage a pu refuser de remplir le questionnaire. Il arrive plus souvent que le questionnaire est retourné, mais que les données fournies à certaines questions ou pour certaines personnes sont incomplètes. Nous déployons des efforts considérables pour obtenir la réponse la plus complète possible. Les recenseurs vérifient les questionnaires et effectuent des suivis s'il manque des données. Le travail des recenseurs est ensuite vérifié par un surveillant et un technicien du contrôle qualitatif. Malgré ces mesures, à la fin de la phase de collecte des données, il manque un petit nombre de réponses. Bien que les entrées manquantes soient éliminées pendant le traitement des données, il peut toujours se glisser quelques erreurs dues à la non-réponse. Ce genre d'erreur est particulièrement grave si les nonrépondants sont différents des répondants à certains égards puisque, comme on le décrit dans un paragraphe ultérieur, la valeur manquante est remplacée par une valeur correspondante tirée d'un dossier "similaire". Si certaines caractéristiques des non-répondants diffèrent de celles des répondants, cette méthode entraîne un biais dû à la non-réponse.

Même lorsqu'on obtient une réponse, il se peut qu'elle ne soit pas tout à fait précise. Le répondant peut avoir mal interprété la question ou avoir donné une réponse incertaine, surtout s'il a répondu pour un autre membre du ménage qui était peut-être absent. Ces erreurs sont appelées erreurs de réponse. Bien que les erreurs de réponse soient en général attribuables à des renseignements imprécis fournis par les répondants, elles peuvent parfois être liées à des

93-154 93-154

erreurs qu'a faites le recenseur au moment où il a rempli certaines sections du questionnaire, comme le type de construction résidentielle, ou lorsqu'il a rappelé le répondant pour obtenir des données manquantes.

À certaines questions du recensement, il faut inscrire une réponse en toutes lettres. Pendant le dépouillement au bureau régional, on attribue un code numérique à ces réponses "écrites". Il peut alors se produire des erreurs de codage, surtout lorsque la liste des codes est longue (comme dans le cas de la langue, de l'origine ethnique, de l'industrie et de la profession) ou lorsque la réponse écrite est ambiguë, incomplète ou difficile à lire. En vérifiant un échantillon du travail de chaque préposé au codage et en prenant des mesures correctives s'il y a lieu, on peut contrôler les erreurs de codage, sans toutefois les éliminer complètement.

Après le codage et certaines autres étapes du dépouillement manuel des données, les renseignements figurant sur les questionnaires sont introduits sur clavier dans un fichier d'ordinateur. Deux procédures servent à contrôler le nombre d'erreurs à la saisie des données. Premièrement, certaines vérifications (comme le contrôle des tranches) sont effectuées au moment de l'introduction des données. Deuxièmement, un échantillon de chaque lot de documents est réintroduit et comparé à la série de données originale. Si le nombre d'erreurs dans la série originale est supérieur à un nombre déterminé, tout le lot doit être réintroduit.

Une fois que les données sont saisies, elles sont envoyées à Ottawa, où elles font l'objet d'une série de contrôles informatiques permettant de découvrir des réponses manquantes ou Dans le cas des réponses incohérentes. incohérentes, il faut d'abord décider quelle réponse doit être considérée non valide. Les réponses non valides ou manquantes doivent ensuite être remplacées par de bonnes réponses, c'est-à-dire par des réponses compatibles avec les autres données figurant sur l'enregistrement. Dans une faible proportion de cas, la bonne réponse peut être déduite à partir des autres données de l'enregistrement. Toutefois, dans la plupart des cas, cela est impossible, et la bonne réponse est tirée d'un enregistrement "donneur" choisi au hasard parmi un groupe d'enregistrements cohérents où un certain nombre de caractéristiques connexes sont similaires à celles de l'enregistrement incomplet. On ne peut bien sûr garantir que la valeur imputée sera nécessairement la bonne réponse pour la personne concernée. Néanmoins, si les enregistrements

contenant des données non valides ou manquantes sont, en moyenne, similaires aux enregistrements valides, les <u>erreurs à l'imputation</u> sont plus ou moins éliminées lorsque les résultats sont totalisés pour une région géographique ou un sous-groupe de la population suffisamment important.

On mène actuellement diverses études pour évaluer la qualité des réponses obtenues dans le cadre du recensement de 1986. Pour chaque question, on a calculé des taux de réponse et des taux de rejet à la vérification. Ces taux peuvent servir à déterminer la présence possible d'erreurs dues à la non-réponse et d'autres erreurs. De plus, les totalisations du recensement de 1986 ont été, ou seront, comparées à des estimations correspondantes établies à partir de recensements antérieurs, d'enquêtes-échantillon (comme l'Enquête sur la population active) et de divers dossiers administratifs (comme les extraits de naissances et les rapports d'évaluation municipale). Ces comparaisons peuvent indiquer certains problèmes potentiels au niveau de la qualité ou du moins certaines incohérences entre les sources d'information.

En plus de ces comparaisons globales, on étudie actuellement les données de certains particuliers en comparant les réponses du recensement à une autre source de renseignements. Pour certaines caractéristiques "stables" (comme l'âge, le sexe, la langue maternelle, le lieu de naissance, etc.), les réponses obtenues au recensement de 1986 sont comparées aux renseignements fournis pour les mêmes personnes au recensement de 1981. De plus, après le recensement de 1986, on a dénombré une seconde fois un échantillon de répondants. surtout pour déterminer les taux de surdénombrement. En même temps, les interviewers ont posé une série de questions détaillées sur la langue, l'origine ethnique et le type de construction résidentielle, et les réponses seront comparées aux réponses fournies au recensement. ce qui nous permettra de déterminer les erreurs de réponse et, nous l'espérons, de les comprendre.

#### ERREURS D'ÉCHANTILLONNAGE

Les estimations qui sont obtenues par la pondération des réponses recueillies auprès d'un échantillon sont sujettes à une erreur vu que la répartition des caractéristiques au sein de l'échantillon n'est habituellement pas identique à la répartition des caractéristiques au sein de la population à partir de laquelle l'échantillon a été prélevé.

L'erreur possible introduite par l'échantillonnage variera en fonction de la rareté relative de la caractéristique au sein de la population. Lorsqu'il y a des cases comportant des chiffres assez grands, l'erreur possible attribuable à l'échantillonnage, en proportion de la valeur de la case, sera relativement petite. Si les valeurs des cases sont petites, cette erreur, en proportion de la valeur de la case, sera toutefois relativement importante.

L'erreur possible due à l'échantillonnage est généralement exprimée en termes d'"erreur type". Ceci est la racine carrée de la moyenne, tirée de tous les échantillons possibles de même taille et du même plan, de l'écart quadratique de l'estimation de l'échantillonnage à la valeur pour la population totale.

Le tableau ci-dessous présente une évaluation approximative de l'erreur type provenant de l'échantillonnage. Cette évaluation ne devrait servir que de guide.

Les utilisateurs qui désirent connaître l'erreur approximative provenant de l'échantillonnage pour une case de données en particulier, d'après l'échantillon de 20%, n'ont qu'à choisir la valeur de l'erreur type dans la colonne du tableau des erreurs pour une case de données en particulier, d'après l'échantillon de 20%, n'ont qu'à choisir la valeur de l'erreur type dans la colonne du tableau des erreurs types dont la rubrique est le plus près de la valeur de la case dans la totalisation du recensement. Lorsqu'il utilise la valeur obtenue de l'erreur type. l'utilisateur peut en général être raisonnablement certain que la valeur réelle de la population recensée (si l'on ne tient compte d'aucune forme d'erreur autre que l'échantillonnage) se situera à plus ou moins trois fois l'erreur type (par exemple. pour une case dont la valeur est 1,000, l'écart s'étendra de 1,000 + ou - 3X65 ou 1,000 + ou -195).

Les erreurs types données dans le tableau cidessous ne s'appliqueront pas aux totaux ou totaux partiels de la population ou de l'univers (personnes, ménages, logements ou familles) de la région géographique à l'étude (voir Échantillonnage et pondération). On peut connaître l'effet de l'échantillonnage sur ces cases en consultant la publication correspondante qui présente les données intégrales.

Les répercussions du plan d'échantillonnage et de la procédure de pondération utilisés au recensement de 1986 varieront cependant d'une caractéristique à une autre et d'une région géographique à l'autre. Les valeurs de l'erreur type dans le tableau ci-dessous pourront toutefois surestimer ou sous-estimer l'erreur provenant de l'échantillonnage.

Pour de plus amples renseignements sur la qualité des données du recensement, veuillez communiquer avec la Division des méthodes d'enquêtes sociales de Statistique Canada, Ottawa, Canada K1A 0T6 (613) 951-6929.

# CONFIDENTIALITÉ ET ARRONDISSEMENT ALÉATOIRE

Par souci de confidentialité, les chiffres publiés dans le présent rapport ont subi un "arrondissement aléatoire" qui supprime toute possibilité d'associer des chiffres à une personne facilement reconnaissable. Grâce à cette méthode, tous les chiffres, y compris les totaux, sont arrondis de façon aléatoire (vers le haut ou vers le bas) jusqu'à un multiple de "5". Cette technique assure une protection efficace contre la divulgation directe, par soustraction ou par méthode résiduelle, sans ajouter d'erreur significative aux données du recensement. Cependant, comme les totaux sont arrondis séparément, ils ne correspondent pas nécessairement à la somme des chiffres arrondis dans les répartitions. De plus, il faut s'attendre à ce que les totaux et les autres chiffres correspondants dans diverses totalisations

Tableau: Erreur type approximative provenant de l'échantillonnage des données-échantillon du recensement de 1986

		Valeur des cases										
Erreur type approxi- mative	50	100	200	500	1,000	2,000	5,000	10,000	20,000	50,000	100,000	500,000
	15	20	30	45	65	90	140	200	280	435	600	1,300

93-154

du recensement présentent quelques légères différences. De même, la somme des pourcentages calculés à partir de chiffres arrondis ne correspond pas forcément à 100. Les répartitions en pourcentage et les taux sont dans la plupart des cas basés sur des données arrondies, alors que les variations en pourcentage et les moyennes sont basées sur des données non arrondies.

La distorsion importante pouvant résulter de l'arrondissement aléatoire lorsqu'il s'agit de cases de faible valeur préoccupe certains utilisateurs. Cette distorsion, qui assure la protection contre la divulgation, entraîne une perte de précision des cases de données renfermant des chiffres peu élevés. Cependant, comme il s'agit d'une méthode aléatoire, les erreurs dues à l'arrondissement ont tendance à disparaître lorsque les cases de données sont agrégées de nouveau. Il est aussi possible de réduire les distorsions en intégrant des totaux partiels dans les totalisations. On peut aussi choisir de demander des totalisations spéciales établies à partir des bases de microdonnées du Dans le cas de produits recensement. personnalisés, l'arrondissement aléatoire se fait après que les cases de données ont été agrégées, ce qui réduit la distorsion au minimum.

Outre l'arrondissement aléatoire, on a adopté d'autres techniques, telles que la suppression des régions et des cases, afin d'assurer encore mieux la confidentialité des réponses.

Dans le cadre de la suppression des régions, toutes les données caractéristiques se rapportant à la région géographique sont supprimées et remplacées par le symbole (XXX). La suppression des données se fait différemment selon qu'il s'agit d'une région normalisée, c.-à-d. regroupant des secteurs de dénombrement (une circonscription électorale fédérale, une division de recensement, une subdivision de recensement, un secteur de recensement, etc.) ou d'une région non normalisée pour laquelle l'utilisateur désire une totalisation spéciale. Les données sont supprimées si la population est inférieure à 40 personnes dans le cas des régions normalisées, et à 100 personnes lorsqu'il s'agit de régions non normalisées. Pour les tableaux renfermant des répartitions des revenus, on supprime aussi les données relatives aux régions dont la population est inférieure à 250 personnes. Toutefois, les données supprimées sont incluses dans les totaux, partiels ou non, à un niveau d'agrégation supérieur. Cette technique est appliquée à tous les produits renfermant des données infraprovinciales (c.-à-d. la série des Profils, les produits sommaires de base, les produits personnalisés et semi-personnalisés), qu'il s'agisse de données intégrales ou de données recueillies sur un échantillon de 20%.

Nota: Pour les données-échantillon, la suppression des régions est fondée sur la population hors institution plutôt que sur la population totale, étant donné qu'aucune donnée-échantillon n'a été recueillie pour la population des institutions.

Dans le cas de la suppression des cases, il faut préciser une valeur minimale acceptable. Toutes les cases dont la valeur est inférieure au seuil établi sont supprimées et remplacées par le symbole (XXX). Les données supprimées sont toutefois incluses dans les totaux, partiels ou non, à un niveau d'agrégation supérieur. Pour les données de 1986, on a mis en oeuvre deux méthodes différentes de suppression des cases. Dans le cas des publications de la série "Le Pays" et de la série "Dimensions" portant sur le revenu, la profession précise ou l'industrie précise, on supprime la répartition lorsqu'il s'agit de moins de 250 personnes ou unités. Dans le cas de totalisations personnalisées ou personnalisées se rapportant à des variables recueillies à partir d'un échantillon, toutes les cases dont la valeur est de "5" (après arrondissement aléatoire) sont supprimées.

# **NOTES SPÉCIALES**

# CHIFFRES DE POPULATION BASÉS SUR LA RÉSIDENCE HABITUELLE

Les chiffres de population présentés ici pour les différentes régions géographiques indiquent le nombre de Canadiens qui y ont leur lieu habituel de résidence, sans égard au lieu où ils se trouvaient le jour du recensement. Sont également comptés les Canadiens séjournant dans un logement de la région en cause le jour du recensement et n'ayant pas de lieu habituel de résidence ailleurs au Canada. Dans la plupart des régions, il n'y a guère de différence entre le nombre de résidents habituels et le nombre de personnes séjournant dans la région le jour du recensement. Toutefois, dans certains endroits, comme les lieux de villégiature et les régions où sont situés des camps de chantier importants, la différence entre ces deux chiffres peut être importante.

### RÉSERVES INDIENNES ET ÉTABLISSE-MENTS INDIENS PARTIELLEMENT DÉNOMBRÉS

Lors du recensement de 1986, le dénombrement n'a pas été autorisé sur certaines réserves indiennes et établissements indiens ou a dû être interrompu parce qu'on ne pouvait le mener à terme.

Les données de 1986 ne sont donc pas disponibles pour les réserves indiennes et les établissements indiens partiellement dénombrés et ne sont pas comprises dans les totalisations. Les données sur les régions géographiques ayant une ou plusieurs de ces réserves ou établissements font donc l'objet d'un nota approprié. En raison des données manquantes, les utilisateurs doivent prendre note que les comparaisons (par ex., des variations en pourcentage) entre 1981 et 1986 ne sont pas exactes pour les régions géographiques en cause. L'effet des données manquantes est très faible pour les régions géographiques de niveau plus élevé (Canada, provinces, régions métropolitaines de recensement et agglomérations de recensement) mais peut être plus important pour les petites régions où les réserves et établissements indiens en cause représentent une proportion plus grande de la population.

Bien qu'il soit impossible d'estimer la population de chaque réserve partiellement dénombrée, les estimations de la population totale manquante et du nombre total de logements privés occupés au niveau provincial ont été faites et sont présentées à l'annexe 1.

Veuillez noter par contre qu'il a été impossible d'estimer les caractéristiques de la population manquante, même au niveau provincial.

Pour de plus amples renseignements sur ce sujet, reportez-vous au Bulletin d'information à l'intention des utilisateurs, numéro 1, "Sommaire de la méthode utilisée pour l'estimation de la population et du nombre de logements privés occupés dans les réserves indiennes où le dénombrement a été incomplet".

# COMPARABILITÉ ET QUALITÉ DES DONNÉES SUR LA LANGUE

# Comparaison entre 1981 et 1986

Langue maternelle et langue parlée à la maison. Les mêmes questions linguistiques ont été posées lors des deux derniers recensements mais pour celles sur la langue maternelle et la langue parlée à la maison, les instructions données aux répondants ont été modifiées. En 1981, les répondants étaient invités à n'indiquer qu'une langue maternelle et qu'une langue parlée à la maison. Malgré cela, 597,980 personnes (2.5% de la population) avaient déclaré plus d'une langue maternelle et 535,735 personnes (2.2% de la population) avaient déclaré plus d'une langue parlée à la maison.

Afin de mieux rendre compte de la réalité linguistique au Canada, ces instructions ont été supprimées du recensement de 1986. En vertu des nouvelles instructions données aux répondants, une personne pouvait indiquer deux langues maternelles si elle les avait apprises simultanément et les avait parlées aussi souvent l'une que l'autre dans son enfance. De même, une personne pouvait indiquer plus d'une langue parlée à la maison si elle les utilisait actuellement aussi souvent l'une que l'autre à la maison.

Le nombre de réponses multiples s'est accru de manière importante lors du recensement de 1986 par rapport à celui de 1981. En 1986, 954,940 personnes (3.8% de la population) ont fourni une réponse multiple à la question sur la langue maternelle et 1,159,675 personnes (4.6% de la population) ont indiqué parler plus d'une langue à la maison.

Cette augmentation résulte soit des modifications apportées au questionnaire, soit des changements dans la manière dont la population répond aux questions linguistiques, soit d'un accroissement du nombre de personnes ayant appris plus d'une langue maternelle ou du nombre de personnes parlant plus d'une langue à la maison. L'augmentation des réponses multiples peut aussi résulter d'une combinaison de ces facteurs.

Lors du traitement des données de 1981, on n'a retenu et publié qu'une seule langue, même dans les cas où plusieurs avaient été déclarées. En 1986, on a accepté les réponses comprenant plus d'une langue.

Pour faciliter l'établissement des tendances entre les deux recensements, les données du recensement de 1986 ont été ajustées. Dans les cas où plus d'une langue a été indiquée, les réponses multiples ont été réparties entre les langues composantes dans les mêmes proportions qu'au recensement de 1981. Les résultats ont été publiés dans un document spécial intitulé "Données linguistiques ajustées", avril (1988). De plus, les données du recensement de 1981 on été ajustées pour faire état des réponses multiples alors obtenues. Les données sont présentées dans le tableau 4 des publications 93-102 (langue maternelle) et 93-103 (langue parlée à la maison). Ces ajustements aux chiffres de la langue maternelle et de la langue parlée à la maison facilitent la mise en relation des données de 1986 avec celles de 1981, mais ne rendent pas parfaitement comparables les résultats des deux recensements. Par conséquent, il faut être très prudents dans l'interprétation des changements observés entre 1981 et 1986.

Des modifications ont été apportées à la classification des langues de 1986 par rapport à celles de 1981, notamment en ce qui concerne les langues autochtones. L'annexe B du Dictionnaire du recensement de 1986 (n° 99-101F au catalogue) nous donne une description des changements.

Langue officielle. Certains répondants ont déclaré parler l'anglais ou le français ou les deux à la maison alors qu'ils ont indiqué, à la question sur la langue officielle, ne pas pouvoir soutenir une conversation dans ces deux langues.

Dans de tels cas, au recensement de 1981, la réponse à la question sur la langue officielle était considérée comme étant erronée. Par conséquent, au cours du traitement des données, cette réponse était modifiée afin de montrer que la personne pouvait parler la (les) langue(s) officielle(s) qu'elle avait déclarée(s) à la question sur la langue parlée à la maison.

Au recensement de 1986, ces réponses n'ont pas toujours été considérées comme étant erronées. Si le répondant avait indiqué pouvoir parler une seule des langues officielles, soit l'anglais ou le français, et que cette langue correspondait à la langue maternelle de cette personne, aucune correction n'a été apportée lors du traitement. Par conséquent, ces enchaînements de réponses apparaissent tels quels dans les totalisations de 1986.

Langues autochtones. Les utilisateurs sont priés de noter que les données pour certaines réserves et établissements indiens ne sont pas disponibles (voir la note spéciale "Réserves indiennes et établissements indiens partiellement dénombrés"). Parmi la population qui a participé au recensement de 1986, 138,000 personnes ont déclaré une seule langue maternelle autochtone et 97,000 personnes ont déclaré parler une seule langue autochtone à la maison. Les personnes qui ont déclaré "Indien" comme langue sont comptées dans la catégorie "Langues amérindiennes, non incluses ailleurs (n.i.a.)". Cette catégorie comprend 8,000 personnes pour la langue maternelle et 5,500 personnes pour la langue parlée à la maison. Elle est également comprise dans le total des langues autochtones. Les utilisateurs sont priés de noter que pour la langue maternelle, environ le quart des 8,000 réponses classées dans cette catégorie, pour le Canada, ont été fournies par des personnes d'origine asiatique. Dans les provinces de l'Atlantique et en Colombie-Britannique, la proportion est à peu près la même que pour l'ensemble du pays. Au Manitoba, en Saskatchewan et dans les territoires, elle est de moins de 5%. Au Québec et en Alberta, elle est

supérieure à celle du Canada, soit à peu près 40% et 45%. En Ontario, environ 2 répondants sur 3 dans cette catégorie étaient d'origine asiatique. Pour la langue parlée à la maison, la proportion de personnes d'origine asiatique est plus importante: environ 50% des 5,500 répondants pour le Canada. La proportion est également d'environ 50% au Québec. Approximativement 2 répondants sur 3 étaient d'origine asiatique en Colombie-Britannique et 4 sur 5 en Alberta et en Ontario. Comme pour la langue maternelle, la proportion est inférieure à 5% au Manitoba. Dans les autres provinces et territoires, très peu de gens ont indiqué "Indien" comme langue parlée à la maison.

Pour de plus amples renseignements au sujet des données linguistiques, veuillez communiquer avec la Division des statistiques sociales, du logement et des familles, Statistique Canada, Ottawa, Canada K1A 0T6.

# COMPARABILITÉ DES DONNÉES SUR L'ORIGINE ETHNIQUE

Comparaison des chiffres de 1981 et de 1986. Les données sur l'origine ethnique des recensements de 1981 et de 1986 ne sont pas directement comparables.

La question de 1981 portant sur l'origine ethnique qui se lisait "À quel groupe ethnique ou culturel apparteniez-vous, vous ou vos ancêtres, à votre première arrivée sur ce continent?" a été modifiée pour le recensement de 1986. Dans la version de 1986, on a retranché le segment suivant: "à votre première arrivée sur ce continent", car on a jugé qu'il n'était pas valable dans le cas des personnes d'origine autochtone. En 1986, la question a été reformulée comme suit: "À quel(s) groupe(s) ethnique(s) ou culturel(s) appartenez-vous ou vos ancêtres appartenaient-ils?"

En 1986, les répondants devaient indiquer ou préciser leur appartenance à un ou plusieurs groupes selon le cas. En outre, l'addition de deux espaces où le répondant pouvait inscrire une réponse en toutes lettres est l'une des raisons principales de l'augmentation du nombre de réponses multiples à la question sur l'origine ethnique.

De plus, l'ordre de présentation des cases à cocher en réponse à cette question est fondé sur la déclaration selon la fréquence ou les origines ethniques simples relevées en 1981. Ceci a entraîné le changement de position des cases marquées "Chinois" et "Polonais". Compte tenu des recommandations formulées par le Comité spécial sur la participation des minorités visibles à la société canadienne dans le document intitulé: "L'égalité ça presse!" et par la Commission sur l'égalité en matière d'emploi présidée par le juge Abella, la case marquée "Noir" a été ajoutée à la question sur l'origine ethnique en 1986.

Les cases réservées aux autochtones ont également été modifiées. On a remplacé en 1986 les catégories d'Indiens inscrits ou non inscrits, utilisées en 1981, par l'expression "Indien de l'Amérique du Nord". Il convient de noter que des personnes qui ne sont pas d'origine autochtone mais qui détiennent le statut d'Indien inscrit aux termes de la Loi sur les Indiens, à la suite d'un mariage par exemple, ont pu être incluses dans les données sur les autochtones de 1981. Il est possible que ces personnes ne se soient pas identifiées comme "Indien de l'Amérique du Nord" en 1986 et, par conséquent, ne sont pas comptées dans le nombre d'autochtones en 1986. De plus, un nombre indéterminé de personnes d'origine métisse ont pu déclarer, en 1986, une réponse multiple comprenant "Indien de l'Amérique du Nord" et une ou plusieurs autres origines ethniques ou culturelles.

# Réponses unique, multiple et totale

Lorsqu'un répondant n'indique qu'une seule origine, il s'agit d'une "réponse unique". Par exemple, 709,585 personnes au Canada n'ont indiqué comme origine ethnique que l'Italien.

Quand un répondant fait connaître plus d'une origine, il donne une "réponse multiple". Au Canada, quelque 297,325 personnes d'ascendance italienne ont en outre signalé une ou plusieurs autres origines ethniques ou culturelles. Ainsi, 31,495 personnes ont donné la réponse multiple suivante: Italien et Français.

Une réponse totale est la somme des réponses uniques et multiples pour chaque origine ethnique. Par exemple, le chiffre de la réponse totale du groupe ethnique "Italien" est 1,006,910, pour le Canada.

Les réponses uniques, multiples et totales pour chaque groupe ou catégorie ethnique figurent aux tableaux 1 et 2. Par exemple, 709,585 personnes ont déclaré être uniquement d'origine italienne, 297,325 personnes ont déclaré plusieurs origines, dont l'une était l'italien, alors que le groupe ethnique "Italien" compte 1,006,910 personnes. Les réponses multiples "Italien et Français" seront, par conséquent, comptées au tableau 1 et

au tableau 2: dans la réponse multiple pour Italien (297,325 au Canada) au tableau 2 et dans la réponse multiple pour Français (2,030,195 au Canada) au tableau 1.

Les utilisateurs doivent prendre note que la somme des réponses totales pour tous les groupes ethniques sera plus élévée que la population totale pour la région donnée, puisque les répondants ont indiqué plus d'une origine ethnique.

Pour de plus amples renseignements sur les données touchant l'origine ethnique, veuillez communiquer avec la Division des statistiques sociales, du logement et des familles, Statistique Canada, Ottawa (Ontario) K1A 0T6.

# IMMIGRANTS ET PERSONNES NÉES EN DEHORS DU CANADA

Toutes les personnes nées en dehors du Canada ne sont pas nécessairement des immigrants au Canada. En effet, les personnes qui ont indiqué être nées en dehors du Canada mais qui sont des citoyens canadiens de naissance ne sont pas considérées comme des immigrants au Canada. Par conséquent, elles n'ont pas à déclarer l'année d'immigration ou leur âge à l'immigration lorsqu'elles s'établissent au Canada de façon permanente. Ces personnes ont été classées dans la catégorie des non-immigrants, comme au recensement de 1981. Par contre, au recensement de 1971, toutes les personnes nées en dehors du Canada ont été classées comme immigrants et ont dû répondre à la question sur la période d'immigration.

# DONNÉES SUR LE REVENU

Les revenus moyen et médian de même que l'erreur type du revenu moyen de la population de 15 ans et plus sont calculés seulement pour les personnes ayant un revenu, mais également pour toutes les familles de recensement et les ménages privés qu'ils aient ou non déclaré un revenu. Le revenu agrégé calculé à partir de ces données doit être utilisé avec prudence puisque les moyennes ont été calculées avant l'arrondissement. Les médianes ont été calculées à partir d'un groupe de données non publiées.

Le concept du revenu total au recensement de 1986 comprend, pour la première fois, les crédits d'impôt fédéral pour enfants. Le recensement de 1986, comme en 1981, n'a pas recueilli de données sur le revenu des pensionnaires d'institution. Les

statistiques sur le revenu des familles et des ménages sont publiées seulement pour les personnes vivant dans des ménages privés.

Les répartitions des tranches du revenu total et du revenu d'emploi selon certaines caractéristiques pour la population de 15 ans et plus, pour le Canada, les provinces et les territoires, sont publiées dans d'autres bulletins. Les répartitions des tranches de revenu pour les familles de recensement, les personnes hors famille, les familles économiques, les personnes seules et les ménages privés sont également publiées séparément.

Les statistiques du recensement sur le revenu sont sujettes à la variabilité d'échantillonnage. Bien qu'une telle variabilité d'échantillonnage puisse être assez petite pour de grands groupes de population, ses effets ne peuvent être ignorés dans le cas de très petits sous-groupes de population dans une région ou dans une certaine catégorie. Il en est ainsi parce que, toutes choses étant égales par ailleurs, plus grande est la taille de l'échantillon, plus petite est l'erreur. C'est pour cette raison que les données sur le revenu dans les régions où la population non institutionnelle était de moins de 250 habitants ont été supprimées. Par contre, là où les statistiques ne sont pas supprimées mais sont néanmoins fondées sur des totaux relativement petits, nous conseillons fortement aux lecteurs d'être prudents dans l'utilisation et l'interprétation de ces statistiques.

# **ACTIVITÉ**

Les concepts de l'activité au recensement n'ont pas changé entre 1981 et 1986. Par contre, le traitement des données a été modifié, ce qui a entraîné quelques différences. Au recensement de 1986, contrairement aux recensements antérieurs, on n'a posé aucune question sur la fréquentation scolaire. Cette question était utilisée pour le contrôle de la variable de l'activité, plus spécifiquement le chômage. Par conséquent, ces différences de traitement affectent la population en chômage et sont en grande partie concentrées dans le groupe d'âge des 15 à 19 ans. Le tableau cidessous indique l'ampleur de cet effet sur les données, au niveau du Canada.

# NOMBRE DE SEMAINES TRAVAILLÉES

Les données concernant le nombre de semaines travaillées en 1985 doivent être utilisées avec circonspection pour les catégories 40-48 semaines et 49-52 semaines, car certains répondants ont tendance à ne pas inclure leurs congés payés de vacances ou pour autres raisons dans leurs semaines de travail, tel que requis. Ainsi, la catégorie 49 à 52 semaines peut être sous-estimée.

# Activité, recensement du Canada de 1981

Canada	Recensement de 1981 (chiffres publiés en 1981)	Recensement de 1981 (selon le dépouillement de 1986)	Variation en %
Population active de 15 ans et plus	12,054,150	12,081,280	0.23

Nota: On peut obtenir les chiffres provinciaux pour les groupes mentionnés ci-dessus dans la publication nº 93-109 au catalogue, tableau 2.

Abréviation: n.i.a. = non incluses ailleurs

<sup>\*</sup>Le total des réponses multiples de chacune des principales catégories d'origines ethniques n'est pas égal à la somme des groupes ethniques composantes. Par exemple, un répondant qui indique comme origine ethnique "Anglais et Irlandais" sera compté seulement une fois dans la réponse multiple de la principale catégorie ethnique "Origines britanniques" (6,038,760), mais sera compté dans le groupe multiple "Anglais" (4,561,910) et dans le groupe multiple "Irlandais" (2,922,605).

# OÙ NOUS TROUVER?

Les centres régionaux de consultation de Statistique Canada offrent la gamme complète des produits et services du recensement. On y trouve une bibliothèque et un comptoir de vente où les utilisateurs peuvent consulter ou acheter des publications du recensement, des disquettes de micro-ordinateurs, des microfiches, des cartes et plus encore. Chaque centre vous offre la possibilité d'extraire de l'information des systèmes de retrait de données automatisées CANSIM et TELICHART de Statistique Canada. Un service de renseignements téléphonique est également disponible; ce service est gratuit pour les clients se trouvant à l'extérieur des services d'appel locaux. On y offre également plusieurs autres services utiles, allant des séminaires aux consultations. Pour obtenir des renseignements, téléphonez ou écrivez au centre de consultation de votre région. Pour une description concise des produits et services du recensement de 1986, se reporter à la section "Lignes directrices pour l'utilisation de cette publication".

#### Note(s)

- ... Figures not appropriate or not applicable.
- Nil or zero.
- XXX Figures suppressed to protect confidentiality.

#### Footnote(s)

- (1)...Multiple responses occur when respondents provide more than one ethnic origin. For example, a respondent giving the ethnic origin combination "French and Italian" will be shown in the multiple French response category (Table 1) and the multiple Italian response category (Table 2).
- (2)...Total origins is the sum of single and multiple responses for each ethnic group. The sum of total origins for all ethnic groups will be greater than the total population for the geography shown due to reporting of multiple ethnic responses for each group.
- (3) ... Excludes 1986 Census data for one or more incompletely enumerated Indian reserves or Indian settlements (see Special Notes).
- (4)...lncludes Canadian citizenship by birth and Canadian citizenship by naturalization.
- (5) ...Includes citizenship of country of birth and citizenship of country other than country of birth.
- (5) ...lncludes persons born outside Canada who have a Canadian citizenship by birth and, therefore, will not have immigrated to Canada.
- (7) ... Excludes the United Kingdom.
- (8)...The Middle East includes: Bahrain, Iran, Iran, Israel, Jordan, Kuwait, Lebanon, Oman, the People's Democratic Republic of Yemen, Qatar, Saudi Arabia, Syria, United Arab Emirates and the Yemen Arab Republic.
- (9) ... Includes persons born in Canada who do not have a Canadian citizenship by birth, but who do have a valid year of immigration.
- (10)...Includes the first five months only of 1986.
- (11)...Includes "No schooling or kindergarten only".
- (12)...Other non-university education refers to both postsecondary non-university courses requiring secondary school graduation and courses taken in other institutions such as trade schools or vocational centres which may not require secondary school graduation.
- (13)...Includes "Other non-university certificate or diploma" and "Trades certificate or diploma".
- (14)...Includes those with both university and other non-university education as well as those with university only.
- (15)...The term "Postsecondary" refers to all educational qualifications obtained other than secondary (high) school graduation certificate. This includes trades certificates, community college or CEGEP diplomas and all university qualifications.
- (16)...Includes "All other, not elsewhere classified" and "No specialization".
- (17)...Occupation major 'group and industry division totals include computer assignment of the "Not stated". These assignments are based on selected socio-economic characteristics.

#### Nota

- ... N'ayant pas lieu de figurer.
- Néant ou zéro.
- XXX Nombres supprimés afin de protéger la confidentialité.

#### Renvoi(s)

- (1)...Il y a réponse multiple lorsque le répondant déclare plus d'une origine ethnique. Par exemple, un répondant qui déclare la combinaison ethnique "Français et Italien" sera compté dans la catégorie des réponses multiples "Français" (tableau 1) et des réponses multiples "Italien" (tableau 2).
- (2) ...Les origines totales sont la somme des réponses uniques et multiples de chaque groupe ethnique. La somme des origines totales de tous les groupes ethniques est plus élevée que la population totale de la région donnée en raison de la déclaration des réponses multiples à la question sur l'origine ethnique de chaque groupe.
- (3)...Ne comprend pas les données du recensement de 1986 pour une ou plusieurs réserves indiennes ou établissements indiens partiellement dénombrés (voir Notes spéciales).
- (4)...Comprend les citoyens canadiens de naissance et les citoyens canadiens par naturalisation.
- (5) ... Comprend la citoyenneté du pays de naissance et la citoyenneté d'un autre pays que le pays de naissance.
- (6)...Comprend les personnes nées en dehors du Canada qui sont citoyens canadiens de naissance et qui, par conséquent, n'ont pas à immigrer au Canada.
- (7) ... Ne comprend pas le Royaume-Uni.
- (8)...Le Moyen-Orient comprend les pays suivants: Bahreïn, Iran. Iraq, Israël, Jordanie, Koweït, Liban, Oman, République démocratique populaire du Yémen, Qatar, Arabie saoudite, Syrie, Émirats arabes unis et République arabe du Yémen.
- (9) ... Comprend les personnes nées au Canada qui ne sont pas citoyens canadiens de naissance, mais pour qui l'année d'immigration est valide.
- (10)... Ne comprend que les cinq premiers mois de 1986.
- (11)...Comprend "Aucune scolarité ou uniquement l'école maternelle".
- (12)... Autres études non universitaires: cours postsecondaires non universitaires qui exigent un certificat d'études secondaires ainsi que les cours suivis dans d'autres établissements tels que les écoles de métiers ou les centres de formation professionnelle qui n'exigent pas nécessairement de certificat d'études secondaires.
- (13)...Comprend "Certificat ou diplôme d'autres études non universitaires" et "Certificat ou diplôme d'une école de métiers".
- (14)...Comprend les personnes qui ont fait des études universitaires et d'autres non universitaires ainsi que celles qui ont fait des études universitaires seulement.
- (15)...Par "Études postsecondaires", on entend tous les titres scolaires sauf le certificat d'études secondaires. Sont compris les certificats d'écoles de métiers, les diplômes d'un collège communautaire ou d'un cégep et tous les grades, certificats et diplômes universitaires.
- (16)...Comprend "Autres disciplines, non classées ailleurs™ et "Sans spécialisation".
- (17)...Les totaux des grands groupes de professions et des divisions d'industries comprennent les assignations par ordinateur des catégories "non déclarées". Ces assignations sont fondées sur certaines caractéristiques socio-économiques.

- (18)...This category is also referred to as the "Experienced labour force"
- (19)...Includes the following occupation major groups: occupations in natural sciences, engineering and mathematics; occupations in social sciences and related fields; occupations in medicine and health; teaching and related occupations; occupations in religion; artistic, literary, recreational and related occupations.
- (20)...Includes the following occupation major groups: farming, horticultural and animal husbandry occupations; fishing, trapping and related occupations; forestry and logging occupations; mining and quarrying including oil and gas field occupations.
- (21)...Includes the following occupation major groups: processing occupations; machining and related occupations.
- (22)...Includes the following occupation major groups: transport equipment operating occupations; material handling and related occupations, n.e.c.; other crafts and equipment operating occupations; occupations not elsewhere classified.
- (23)...For additional information concerning the data, see "Special Notes" section of text.
- (24) ... Includes loss.
- (25)...For individuals 15 years and over who worked in 1985 and reported employment income for 1985.
- (26) ... Worked 49-52 weeks in 1985, mostly full time.
- (27)...Worked 49-52 weeks in 1985, mostly part time, or worked less than 49 weeks.
- (28)...Includes the multiple origins of British and French, and British, French and other.
- (29)...This is the non-official mother tongue with the highest count for this ethnic origin.
- (30)...Includes the following categories: Irish, Scottish and Gaelic.

#### Abbreviation(s)

n.e.c.= not elsewhere classified.

n.i.e.= not included elsewhere.

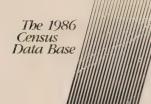

- (18)...On nomme aussi cette catégorie "Population active expérimentée".
- (19)...Comprend les grands groupes de professions suivants: travailleurs des sciences naturelles, du génie et des mathématiques; travailleurs spécialisés des sciences sociales et domaines connexes; médecine et santé; enseignants et personnel assimilé; membres du clergé et assimilés; professionnels des domaines artistique et littéraire et personnel assimilé.
- (20)...Comprend les grands groupes de professions suivants: agriculteurs, horticulteurs et éleveurs; pêcheurs, trappeurs et travailleurs assimilés; travailleurs forestiers et bûcherons; mineurs, carriers, foreurs de puits de pétrole et de gaz et travailleurs assimilés.
- (21)...Comprend les grands groupes de professions suivants: travailleurs des industries de transformation; usineurs et travailleurs des domaines connexes.
- (22)...Comprend les grands groupes de professions suivants: personnel d'exploitation des transports; manutentionnaires et travailleurs assimilés, n.c.a.; autres ouvriers qualifiés et conducteurs de machines; travailleurs non classés ailleurs.
- (23)...Pour de plus amples renseignements sur les données, voir la section "Notes spéciales" du texte.
- (24) ... Comprend les pertes.
- (25)...Se rapporte aux personnes de 15 ans et plus qui ont travaillé en 1985 et qui ont déclaré un revenu d'emploi en 1985.
- (26)...Ayant travaillé 49-52 semaines en 1985, surtout à plein temps.
- (27)...Ayant travaillé 49-52 semaines en 1985, surtout à temps partiel, ou ayant travaillé moins de 49 semaines.
- (28)...Comprend les origines multiples suivantes: Britannique et français, et Britannique, français et autres.
- (29)...Il s'agit de la langue maternelle non officielle ayant été déclarée le plus souvent par les personnes de cette origine ethnique.
- (30)...Comprend les catégories suivantes: irlandais, écossais et gaélique.

# Abréviation(s)

n.c.a.= non classés ailleurs.

n.i.a.= non incluses ailleurs.

# Decisions Décisions

DECISION DATA: The 1986 Census Data Base provides the definitive picture of Canada today and a Focus for the Future. Census products offer researchers, policy analysts and other decision makers maximum flexibility using a core data base together with a range of customized products: vital keys to quality research and good planning.

A corporation is scouting Canada for places to sell summer and winter sporting goods. Seeking target markets that conform to its client profiles, this company will need to look at incomes, occupation, age groups and even family structure to find the best locations. The Census Customized Service designed a package to meet the criteria.

du recensement

A community association was asked to advise the municipal parks committee on the recreation plan for their area. Using census data on family formation, size and standard of living, the association concluded that a children's play area would be under used by the mostly older, working population. They proposed revenue-generating sports facilities be built instead.

Find out more about the 1986 Census Data Service from your nearest Statistics Canada Regional Office. ONNÉES DÉCISIVES: La base de données du recensement de 1986 permet de brosser un portrait définitif du Canada d'aujourd'hui et de faire voile vers l'avenir. Les produits du recensement offrent aux recherchistes, aux analystes des politiques et à d'autres décideurs un maximum de souplesse, et ce grâce à la base de données et à un éventail de produits personnalisés, secrets d'une recherche de qualité et d'une bonne planification.

Une compagnie parcourt le Canada à la recherche de points de vente d'équipement sportif d'été et d'hiver. Pour déterminer les marchés cibles répondant au profil de sa clientèle, bref, les meilleurs emplacements, cette compagnie devra passer en revue les données sur le revenu, la profession, les groupes d'àges et même la composition des familles. Le Service personnalisé du recensement répond précisément à ces besoins..

Une association communautaire devait conseiller le comité municipal des parcs sur le plan de récréation de leur région. En utilisant les données du recensement sur la formation et la taille des familles ainsi que sur le niveau de vie, l'association devait conclure qu'une aire de jeux pour les enfants serait sous-utilisée par la plupart des travailleurs et personnes plus âgées. L'association a donc proposé à la place la création d'installations sportives à but lucratif.

Pour de plus amples renseignements au sujet du Service de données du recensement, veuillez communiquer avec le bureau régional de Statistique Canada le plus près de chez vous.
